No. 29,069 — PARIS, THURSDAY, JULY 15, 1976 — Established 1887

## Briton Told To Get Out Of Uganda

### Formal Ouster Of Second Aide

LONDON, July 14 (AP).—Uganda today formally demanded the withdrawal of charge d'affaires James Horrocks, the second British diplomat expelled this week.

President Idi Amin publicly accused Mr. Horrocks of having been at Entebbe Airport when Israeli commandos rescued more than 100 hostages from a hijacked airliner. Britain denied that Mr. Horrocks or anyone in the British government knew beforehand of the raid, in which 20 Ugandans were reported to have been killed.

Peter Chandley, a second secretary at Britain's High Commission, equivalent to an embassy, was ordered out Monday.

Mr. Chandley saw Mrs. Dora Bloch, a 75-year-old hijack hostage, in a hospital at Kampala shortly after the Israeli raid. She is missing and believed to be dead.

The Ugandan High Commission advised Britain of Mr. Horrocks's expulsion in a telephone call to the Foreign Office in London this afternoon. The high commission said that a note was being delivered formally requesting Britain to withdraw Mr. Horrocks. No official reason was given by the caller, the Foreign Office said.

**To Investigate Blasts**

A Foreign Office spokesman said that the reason Mr. Horrocks headed for Entebbe Airport when in Kampala was to investigate explosions at the time of the July 4 Israeli raid.

Principally because of concern for the safety of 500 Britons at present working in Uganda, the British have been trying to ease the strained relations with Uganda, although Britain has said that it regards the Uganda explanation of Mrs. Bloch's disappearance as unacceptable.

Marshal Amin has said that Mrs. Bloch was handed over to the other hostages. There have been various reports that Mrs. Bloch was, in fact, killed. A report published in Kenya's Daily Nation, in Nairobi, said that her half-burned body had been seen in a forest near Kampala the day after the raid.

Meanwhile, 10 British lawmakers charged that Uganda's High Commission snubbed them today when they went to deliver a letter protesting the reported death of Mrs. Bloch.

The lawmakers, delivering the letter on behalf of a group called the British Committee for Dora Bloch, said that they found the commission doors locked and bolted.

Ugandan High Commissioner Frederick Kiiragura Isingoma then walked straight past them and away from the building, they added.

Labor member of Parliament Greville Janner said that it was a deliberate snub."

## Syrian Units Pull Back From Sidon

BEIRUT, July 14 (UPI).—Syrian Army units pulled back from the leftist-held southern port of Sidon today, setting the stage for a new cease-fire with Palestinian guerrilla forces.

Syrians and Palestinians reportedly fought house-to-house battles in Baalbek, while sporadic machine-gun duels broke a relative calm in northern Lebanon, Beirut and around the Palestinian Tal Zaatar camp.

The Palestinian news agency Wafa confirmed the Syrian withdrawal from Sidon, 30 miles south of Beirut, to the village of Jezzine, 14 miles inland. Palestinian sources said four Syrian battalions also pulled back beyond Jezzine to the Bekaa Valley, fulfilling a key Palestinian demand.

The Syrian forces had swept to the outskirts of the port last month and their artillery repeatedly shelled Palestinian positions in the city and a nearby leftist-held oil refinery.

The conciliatory move followed an Arab League foreign ministers' meeting in Cairo, which called for Syrian-Palestinian reconciliation and tacitly endorsed Damascus's unilateral intervention in Lebanon.

One high Palestine Liberation Organization official, Majeb Abu Sharar, criticized the Arab League decision as "a cover for Syrian military intervention," and said the PLO endorsed it only because it called for the Syrian withdrawal. But other PLO statements were "optimistic" about the peace efforts.

Palestinian forces have recently suffered heavy losses in the north and in the long Christian siege of Tal Zaatar, and PLO sources said Palestinian leader Yassir Arafat may decide to de-escalate his involvement in the civil war before his side's position worsens further.

In Cairo, the Arab League sec-

### Discussion Is Rejected

## Democrats Vote a 'Carter' Platform

By R.W. Apple Jr.

NEW YORK, July 14 (NYT).—The Democratic National Convention adopted early today a platform bearing the clear imprint of Jimmy Carter after sweeping away a last potentially divisive issue.

Only a few scattered "Nays" were heard as the party program, containing six major chapters, was approved on a ringing voice vote.

All afternoon and all evening, at a second session that lasted about eight hours, party heroes past and present, from Wallace to Daley to McGovern to Humphrey, stated the theme of unity.

In the first recorded vote of their 37th quadrennial convention, the Democrats defeated a proposal that would have permitted discussion of three unspecified issues for 20 minutes each. Supporters of Jimmy Carter, demonstrating total control, trounced a liberal coalition by a vote of 1,857 1/2 to 735.

Michael Bleicher, the Wisconsin national committeeman who originated the proposal, argued that dissent was "vital to the democratic process" and expressed frustration at the decision to prevent an ideological dialogue.

But his was a lonely voice in the festival of party harmony and political decorum that the Democrats have mounted this week in Madison Square Garden.

**Compromise Accepted**

During the day, the Women's Caucus accepted a compromise committing the party to promote rather than require equal representation for women. Mr. Carter welcomed the prospect that others' names would be placed in nomination tonight, and a parade of speakers proudly forecast a Democratic triumph in November.

Sen. Hubert Humphrey of Minnesota, whose presidential ambitions were frustrated for a fourth time this year, preached to the gathering once more on his "politics of joy."

A great peal of applause rang out as Sen. Humphrey strode to the podium. The Minnesota liberal, clad in a powder-blue suit, stood for 3 1/2 minutes and let the cheers go on. When Mrs. Corrine Boggs, the permanent chairman, called for order, the delegates shouted back with one voice, "No!"

Savaging the Republicans as "these modern Tories," he said the Democrats would win this fall "not because we have some magic cure for our ills" but "because the people know we care, and because they know we dare to try."

The delegates had a warm greeting for Sen. George McGovern of South Dakota, the party's 1972 presidential candidate, who declared four years ago in Miami Beach that "we are not conceding a single state" and then went on to lose all but Massachusetts and the District of Columbia.

**Mrs. Onassis Present**

## U.S. Cutting Military Advisers Abroad by Edict of Congress

By John W. Finney

WASHINGTON, July 14 (NYT).—The Defense Department, under a congressional edict, is reducing the military advisory teams that began by administering military aid to foreign countries and ended up serving largely as the foreign service of the Joint Chiefs of Staff.

The department has military assistance advisory groups—MAAGs, as they are known in the Pentagon—in 44 nations. The largest are in South Korea, Iran, Thailand, Saudi Arabia and Turkey, all major recipients of U.S. arms; smaller teams are maintained in Latin America, Africa, Europe, the Middle East and the Pacific.

Under recently passed foreign aid legislation, the number of missions must be reduced to 34 by fall, and by October, 1977, all except those specifically authorized by Congress must be abolished.

**Early Purpose**

Deputy Secretary of Defense William Clements Jr. observed recently that the MAAGs have become "almost like the dodo bird"—not quite extinct but overtaken by changing patterns of military aid.

Created during the cold war when the United States undertook vast military aid, first in Europe and then elsewhere, the teams' purpose was to administer military aid, and advise and train foreigners in its use.

The aid has been cut to an annual level of less than $500 million as the Defense Department has shifted its emphasis to selling arms, either for cash or on easy credit. The missions have tended to linger on, however, gradually reduced in size but not in number.

In Congress, there has been a growing feeling not only that the missions were a relic of the past but also that their continuation could lead to commitments and involvements beyond stated policy. The U.S. involvement in South Vietnam began with a military aid program.

The congressional attitude has been influenced by the view in the State Department that the missions, which report to the joint chiefs, were encumbering if not undercutting the Foreign Service's role.

Mr. Clements said that the Defense Department agreed with Congress on the need to phase out most of the missions. "I would like to see it done more rapidly," he said, "but we can't do it in a precipitous manner because of some of the countries involved."

According to Pentagon and congressional sources, however, the move has not exactly been welcomed by the joint chiefs, who view the missions as a useful assignment opportunity, particularly for senior officers nearing retirement, as well as serving as their own foreign service.

That was reflected in testimony in April by Lt. Gen. Howard Fish Jr., director of the Defense Security Assistance Agency, who told the Senate Foreign Relations Committee that the missions were essential for administering military assistance and for "building up a relationship of mutual trust and confidence with the host country's military establishment."

## U.S. Cites Israeli Self-Defense In Using Aircraft for Rescue

By Murrey Marder

WASHINGTON, July 14 (WP).—The State Department has concluded that there was "no violation" of U.S. law in Israel's use of U.S.-manufactured C-130 military aircraft for the commando raid in Uganda on July 4. The conclusion was not surprising; the significance of the ruling is the precedent that it can establish, U.S. officials consider.

The law on arms sales requires such material to be used only for internal security, self-defense, regional defense or measures consistent with the UN Charter. The State Department ruled that Israel had used the three C-130 transports in Uganda for "legitimate self-defense" permitted under the Foreign Military Sales Act. That was an unusual application of self-defense terminology since the raid occurred 2,200 miles from Israel.

Another U.S. argument supporting the legality of Israel's rescue raid was presented at the U.N. Security Council on Monday by U.S. Ambassador William Scranton. Although he conceded that the hostage rescue "necessarily involved a temporary breach of the territorial integrity of Uganda," which normally would be impermissible under the Charter of the United Nations," he said:

"There is a well-established right to use limited force for the protection of one's own nationals from an imminent threat of injury or death in a situation where the state in whose territory they are located either is unwilling or unable to protect them. The right, flowing from the right of self-defense, is limited to such use of force as is necessary and appropriate to protect threatened nationals from injury."

In the Israeli raid, the United States has claimed that not only did Uganda fail to prevent injury or death to Israeli victims of an aerial hijacking, but that Uganda also "cooperated with and aided the hijackers," doubly defaulting on its international obligations.

Mr. Scranton noted that both Uganda and Israel signed the 1970 convention for the suppression of unlawful seizure of aircraft by hijacking.

Uganda, he said, failed to live up to its obligations under that convention, which he said requires a contracting state to "take all appropriate measures to restore control of the aircraft to its lawful commander," to facilitate the continuation of the journey of passengers and crew, and to "take the hijackers into custody and either prosecute or extradite them."

U.S. sources said they regard the prospects as remote that a government would attempt to repeat the alleged Uganda action of collusion in a hijacking. Therefore, they said, they question how much of a realistic legal precedent is involved.

### But Communists Barred

# Spain Political Parties Legalized by Cortes

MADRID, July 14 (UPI).—The Cortes (parliament) today legalized most political opposition activity but rejected a proposal that could have led to legalization of the Communist party.

The 554-member parliament took the actions by approving a bill amending the Spanish penal code that, until now, outlawed most opposition activities and provided stiff punishments for such activities.

The bill, described by Justice Minister Landelino Lavilla Alsina as a "firm step toward a modern democracy," was approved by 245 votes to 175, with 57 abstentions.

The vote was a victory for the government of new Premier Adolfo Suarez, who has promised to push ahead with reform programs started by the government of Carlos Arias Navarro, whom Mr. Suarez replaced last week. In the final roll-call today, Mr. Suarez and his 18 ministers present voted for the bill.

An earlier draft of the measure passed today was rejected by the Cortes on June 9 in an apparent reaction to a political assassination in the Basque region.

In an afternoon session on June 9, the first of two bills providing for the return of political parties was passed. It established the right of Spaniards to "associate themselves freely for legitimate ends" and to form political parties. But that evening—after the assassination—the bill providing for changes in the penal code was defeated.

Today's vote averted a government crisis even more serious than the one that put Mr. Suarez in power last week, sources close to the government said.

They said the more liberal members of the Cabinet would have quit if the Cortes had rejected the bill. But backed by the positive vote, the program of the new government, due for release Friday, will be seen as an expression of the Suarez regime's "increased confidence and desire to move ahead quickly in bringing democracy to Spain," the sources said.

The key article of the new law maintains a ban on all parties "obeying orders from abroad and aiming at establishing a totalitarian regime." Under this article, the Communist party appears to have little chance of being legalized.

In an earlier vote today, the deputies rejected by 240 to 198, with 49 abstentions, a more liberal version of the article under which the Communist party was judged to have a chance at legalization. The liberal version defined the parties to be banned as those which "attack human dignity and liberty and are opposed to political pluralism."

Approval of the bill was a necessary step toward an amnesty for political prisoners, which government sources say the government is ready to grant. The sources said that since the new law legalizes most political association, assembly and propaganda, persons that have been sentenced for such activities could expect to be freed.

The penal code law is designed to work in conjunction with the new political associations law that look effect July 6, and set down the rules for the establishment and functioning of parties.

The opposition, including the Socialists and liberal Christian Democrats, has criticized this reform package but has not specifically ruled out participation.

At the start of today's special Cortes session, Speaker Torcuato Fernandez Miranda put down a conservative effort to water down the penal code bill. On a technicality, he rejected a last-minute amendment that specified that "all national and international Communist groups" should be banned and that implicitly supported rightist extremist activity.

The political opposition criticized the Cortes for not accepting the more liberal version of the bill.

## Eanes Warns Portugal's Reds During His Inaugural Addres

LISBON, July 14 (AP).—Army Gen. Antonio Ramalho Eanes took office as Portugal's President today pledging to oppose "demagogic minorities" and restore law and order.

"We must eliminate a climate of coups and anarchy, which can only lead to misery and dictatorship," President Eanes, 41, declared after being sworn in as the country's first freely elected head of state in half a century.

President Eanes was seen directing his remarks at the Communist party, implicated in a military coup attempt last November that he had a key role in defeating.

Communist deputies did not join the other parties in the half-dozen ovations that interrupted President Eanes's 30-minute address at the National Assembly building.

**Communists Not Named**

Although the former army chief of staff did not mention the Communist party by name, he referred to the crushing of the November uprising as a "clear reaffirmation" of freedom in Portugal.

President Eanes claimed "minorities" had tried to deny that freedom.

Both President Eanes and Socialist party leader Mario Soares, whom he has said he will name as Premier, have vowed to exclude the Communists from the government of this NATO country for the first time since the military's overthrow of the former rightist regime in April, 1974.

President Eanes warned against repeat of the Communist-inspired labor unrest that led up to the November uprising. He claimed his intention to bring the country to Socialism through hard work and respect for the laws "can only benefit the workers" and warned them against "demagogic appeals that can only mean a return to the past."

## Talks Begun On Cabinet By Andreotti

ROME, July 14 (Reuters).—Italy's premier-designate, Giulio Andreotti, began talks today on forming a government while the small but crucial Socialist party met to elect a new leader.

Mr. Andreotti, a Christian Democrat, met leaders of the small Republican and Social Democratic parties for a preliminary exchange of views. He is due to meet leaders of his own party tomorrow.

The central committee of the Socialist party, whose support is essential if Mr. Andreotti is to form a government majority, met in a Rome hotel to choose a new leader after the resignation yesterday of 69-year-old Francesco de Martino.

Informed sources said the Socialists might re-elect Mr. de Martino despite the party's poor showing in last month's general election, but the name of Benedetto Craxi, the 42-year-old vice-secretary, was also being mentioned.

Giacomo Mancini, a former Socialist party secretary with close personal links to Mr. Andreotti, said in an interview published today that he was not a candidate for the post.

Mr. Andreotti's meetings were seen as a sign that he intended to try to enlist the support of at least two of Italy's smaller parties for a Christian Democrat-dominated administration.

But political sources said his main problem remained that of gaining the trust of the Socialists, without whom he will be able to form only a minority government.

Yesterday, a 30-year-old member of a Fascist group was arrested and charged with threatening the judiciary, as the police continued their search for the killer of Rome's deputy public prosecutor, Vittorio Occorsio.

Giancarlo Cartocci, a leading member of Ordine Nuovo, the Fascist group that has claimed responsibility for the assassination, fell ill when arrested.

## Bastille Day Parade, in Paris Rain, Loses Some Traditional Touches

PARIS, July 14 (UPI).—Parisians huddled in a steady rain today to watch a new style of Bastille Day parade—a display of military might stripped of some traditional picturesque touches.

Gone from the annual show was the usual closing number, the French Foreign Legion marching slowly in their leather aprons. The alpine troops in their white uniforms, the parachutists, the Pluton missile and army police dogs of past years were also missing.

The recent drought and the rainfall this week both conspired to tone down the celebrations. The number of fireworks displays, a part of the Bastille Day celebration since its inception in 1880, was trimmed to two, in the Montmartre and Buttes-Chaumont districts, because of the danger of fire.

The steady drizzle that began to fall on the capital at dawn relieved the dry spell, but also caused the cancellation of the traditional flyover of Mirage jets trailing blue, white and red smoke. A planned aerial procession of 36 Mirage and Fouga jets and Puma and Jaguar helicopters was also called off because of the downpour.

Thousands of persons watched 554 military vehicles, including 188 AMX-30 tanks and 12 cannon-equipped tanks, participate in the parade.

After two years of staging the parade in the working districts in eastern Paris, President Valéry Giscard d'Estaing returned the procession to the Avenue des Champs-Elysées, which had been its site before the shift since 1919.

In another departure from tradition, Mr. Giscard d'Estaing reviewed the parade from a grandstand built on the Place de la Concorde instead of one on the Champs-Elysées itself.

# U.K. Slating New Bans to Fight Drought

## Bill Would Impose Fines on Water Use

*From Wire Dispatches*

LONDON, July 14.—Water-short Britain today introduced new laws to ban sprinkling of golf courses, filling of swimming pools and washing of buildings.

The new bill would empower local authorities to institute the ban whenever water levels sink to the danger level.

In some parts of the country, this level is now being reached after the worst drought in 250 years.

Breaking the regulations could be punished by a £400 ($720) fine by a magistrate or unlimited fines in higher courts.

**Notice of 7 Days**

Planning Minister John Silkin said that water authorities would have to serve seven days' notice before cutting supplies, which they could do if they judged the scarcity likely to "impair the economic or social well-being of a community."

Rain in parts of continental Europe eased the situation but came too late and in too little quantity to save drought-ravaged crops.

France declared the Charente Maritime department on the southwest Atlantic coast a disaster zone, the 20th department to be placed in this category.

Heavy rains over Normandy spread to Par . and drenched thousands watching the Bastille Day military parade.

In Italy, heavy rain and thunderstorms hit Florence and Naples in Italy, causing minor flooding.

## 2 Africans Die in Escape

CAPE TOWN, July 14 (Reuters).—Two African prisoners were shot dead and three wounded when they tried to escape from a working party at the Brandvlei Prison near here, a Prisons Department spokesman said today.

# Poland to Keep Prices Stable Except for 35% Rise for Meat

*From Wire Dispatches*

WARSAW, July 14—Except for meat, basic food prices in Poland will remain unchanged this year, the Communist party Politburo decided yesterday.

Meat prices will rise by 35 per cent sometime this year after "consultations" with workers in major plants.

The proposals were made by Premier Piotr Jaroszewicz at a session of the Politburo. They were published by the official news agency.

Last month the government moved to increase meat prices by an average of 70 per cent. Other staples like butter, cheese and sugar were also earmarked for substantial increases. The increases were hurriedly withdrawn after workers' unrest and work stoppages spread through the country.

The government also decided, effective yesterday, to pay farmers more for their products: for grain, 40 per cent; potatoes, 30; sugar beet, 12; livestock, 20; milk, 31, and eggs, 15. A farmer will now get 530 zlotys (about $26) for 100 kilograms of wheat.

However, prices for farmers also rose—for services by state farming machinery centers, 20 per cent; fertilizer, 20; farming machines, 30, and building materials, 30 to 60.

Today, Poland acted to stop the exodus of inexpensive food purchased by East European tourists in an effort to keep basic foodstuffs at home.

New customs regulations, effective today, said: "Exports of food by non-Polish tourists is restricted to the quantities they need for their return journey home."

Polish tourists traveling abroad could take only two kilograms of meat or meat products per person, the regulations said.

The new regulations mainly affect the East Germans, who, like the Poles, travel without passports across the Polish-East German border. A total of 5 million East Germans visited Poland last year.

The regulations also barred export of furs, leather clothes, jewelry, tires and linen products.

**Soviet Meat Output Declines**

MOSCOW, July 14 (UPI).—Soviet meat production is continuing to decline sharply as the result of last year's poor harvest, according to statistics released today.

The newspaper Economicheskaya Gazeta said meat production last month was 557,000 tons, only 71 per cent of the 781,000 produced in June, 1975.

The decline continued a trend of lower meat out put since Jan. 1. The newspaper reported meat output in the January to April period down by 13 per cent compared with the same period of last year. The January to May period was off by 16 per cent.

Because last year's grain harvest was one-third below expectations, food grain were in short supply and an unusually high number of animals were slaughtered prematurely last fall.

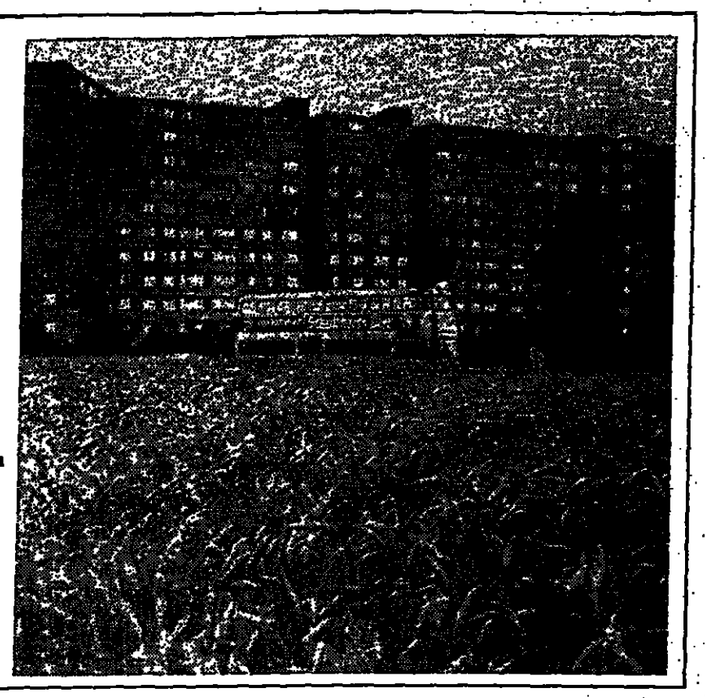

# Air Force to Aid Navy in Tracking Soviet Warships

WASHINGTON, July 14 (AP).—The Air Force is assigning B-52 bombers to help the Navy keep watch on Soviet warships in the far reaches of the Atlantic Ocean.

The Pentagon announced yesterday that the giant, eight-engine, long-range airplanes have started flying sea reconnaissance-surveillance missions from U.S. bases.

"Only a few aircraft will be involved in the flights, which will occur from time to time over various Atlantic Ocean areas of operation," the Pentagon said.

In the past, the armed services have jealously guarded their traditional missions against encroachment. But because of Navy budget cutbacks, the Pentagon said, Navy and Air Force chiefs have signed a formal agreement to share the sea surveillance responsibility "in accordance with the spirit and intent of mutual reinforcement."

WAVING FIELDS OF GRAIN—These are backed up by apartment buildings in West Berlin whose suburban areas include what were described as "large agricultural compounds." AP.

# Syrian Units Quit Sidon

(Continued from Page 1)

retary-general, Mahmoud Riad, said today he was sending one of his top aides to Lebanon "within hours" for another attempt at arranging a cease-fire and peace talks.

He said his political adviser, Hassan Sabry al-Kholy, would "hold contacts with the warring factions because the immediate objective now is to arrange a cease-fire and a political dialogue between them."

Reports reaching Beirut from reporters in Baalbek, in the Syrian-occupied Bekaa Valley 55 miles northeast of the capital, said a Syrian armored force attacked Palestinian positions in the city and seized control of their base camp. Palestinian spokesmen said they lost radio contact yesterday but reported house-to-house fighting in the town today.

In northern Lebanon, Syrian forces shelled the Palestinian camp Nahr al-Bared on the northern outskirts of Tripoli with mortars and rockets, leftist and Palestinian reports said. They said the camp rejected a Syrian ultimatum to surrender.

In Beirut, Christian rightist forces tightened their siege on the Tal Zaatar camp, but said they planned to "starve the Palestinians out" rather than risk a full-scale ground attack. Sporadic machine-gun fire echoed through the ruins of the capital's commercial district, but neither side attempted to seize much new ground.

Libyan Premier Abdel Salam Jalloud arrived from Damascus to resume his peace mission. Palestinian sources said he would meet with leaders from the warring factions and then accompany Mr. Arafat to Damascus for talks with Syrian President Hafez al-Assad.

# Jordan's Premier Retains 2 Posts

AMMAN, July 14 (Reuters).—Jordan's new Premier, Mudar Badran, has retained the foreign affairs and defense portfolios, following the example of his predecessor.

Mr. Badran, whose Cabinet was sworn in late last night, has kept 10 members of the outgoing administration in his 18-man team.

In his letter asking Mr. Badran to form a new government, King Hussein asked him to continue the policies of former Premier Zeid Rifai, maintaining good relations with other Arab states and developing coordination and cooperation with Syria.

# Financial Woes Close 3d Italian Newspaper

LIVORNO, Italy, July 14 (UPI).—Livorno's Il Telegrafo today became the third Italian newspaper in a month to announce it was going out of business for financial reasons.

Il Telegrafo's management said the 100-year-old newspaper would cease publication on July 31 and sent dismissal notices to its staff.

Rome's Giornale d'Italia, owned by the same group as Il Telegrafo, announced earlier this month it was going out of business after 75 years. The Social Democratic party's paper l'Umanita ceased publication last month.

# Opposing Moves Face Defeat In UN Debate on Israeli Raid

UNITED NATIONS, N.Y., July 14 (UPI).—It seemed likely today that opposing African and Western resolutions faced defeat, as the Security Council neared the end of its debate on Israel's commando rescue of hostages in Uganda.

The African measure, sponsored by Benin, Libya and Tanzania, called for condemnation of Israel's "flagrant violation of Uganda's sovereignty and territorial integrity" in the July 4 operation in which Israeli forces rescued more than 100 hostages of a hijacked airliner held at Entebbe Airport near Kampala. It also demanded Israeli reparations to Uganda.

If the resolution can muster the nine votes required for Council approval, it faces certain veto by the United States and probably Britain. Some diplomats doubted that the measure would gain nine votes.

Britain and the United States sponsored a resolution condemning hijacking and calling for top priority to insuring safe and reliable civil aviation by taking "every necessary measure to prevent and punish all such terrorist acts."

Diplomatic sources said that the African and other so-called nonaligned members of the Council, disturbed because the debate on the Entebbe incident was transformed into a sweeping discussion of terrorism, planned to abstain when the vote was taken. The sources gave the U.S.-British measure a maximum total of six votes, three short of the required majority.

The net result of the three-day bitter debate appeared to have been summed up by a British diplomat, who said: "At least we had a debate on terrorism."

Israeli Foreign Minister Chaim Herzog charged last night that Uganda was using blackmail to influence the Council debate.

"We have the ominous news that the government of Uganda is applying the threat of blackmail to foreign nationals in Uganda in connection with the current proceedings in the Security Council," he said.

He was alluding to Ugandan President Idi Amin's statement that "big mouths talking on behalf of the Israelis, such as the British, will pay very heavily." Two British diplomats have been expelled from Uganda, where there are about 500 Britons.

**Mexico Boycott Asked**

MIAMI BEACH, July 14 (UPI).—Angry Zionist leaders here proposed today a boycott of Mexican goods and Mexican travel by U.S. Jews in response to Mexico's denunciation in the UN of the Israeli rescue.

An emergency meeting of the conference of presidents of major U.S. Jewish organizations was called in New York to discuss the proposal. Last year, Miami Beach Jewish organizations called for a travel boycott of Mexico in response to that country's UN vote in favor of a resolution branding Zionism a racist movement.

# Briton Told To Get Out

(Continued from Page 1)

London, was also outside the commission, with another group protesting the affair. Mrs. Hammond said that she had not given up hope that her aunt might be alive. There have been no confirmed reports of Mrs. Bloch's death, she said.

[Ugandan military forces have been ordered to shoot down any British Air Force planes that appear over the country, Radio Uganda reported tonight, according to Reuters.

[In a broadcast monitored in London, the radio also quoted a government military spokesman as saying that the lives of British nationals in Uganda would be endangered if Britain sent any air force planes to Uganda.]

**Flight From Uganda**

NAIROBI, July 14 (Reuters).—Kenyans were reported fleeing from Uganda today as tensions between the two countries remained high.

The newspaper Kenya Standard said that large numbers of Kenyans were crossing the border following Ugandan accusations of Kenyan complicity in the Israeli raid.

Foreign Minister Munyua Waiyaki of Kenya has charged Ugandan authorities with carrying out an indiscriminate massacre of Kenyans.

**Kenya Police Swoop**

NAIROBI, July 14 (UPI).—Police rounded up about 900 persons in Nairobi last night amid reports that Ugandan agents were entering Kenya to kill Kenyans critical of Marshal Amin.

Police declined to say whether the swoop was directed against Ugandans. They said that it was a follow-up to earlier operations aimed at clearing the city of "undesirables."

# Spain Votes Reform Move

(Continued from Page 1)

Fernando Alvarez de Miranda, who was reportedly offered a post in the current Cabinet, said the penal code bill, as passed, "represents in reality a fairly restrictive bill as far as political freedoms go."

The government abstained in the vote on the liberal amendment and, Mr. Alvarez de Miranda said, the Suarez Cabinet thus lost a great chance to demonstrate its support of full reform.

Independent Antonio Garcia-Trevijano said the rejection of the liberal version was a "negative thing." The Spanish Socialist Workers' party said the Cortes' action "proves once again that the reform plans are not viable."

The penal code amendments will take effect as soon as the new law is published in the official state bulletin.

Mr. Arias, who has been criticized for conservatism, voted for the liberal version of the measure relating to Communism. He was not present for the final ballot.

# Turkey Warns On Right to Look For Oil in Aegean

ANKARA, July 14 (Reuters).—Turkish Foreign Minister Ihsan Sabri Caglayangil said today that his government would not let anyone interfere with its right to search for oil in the Aegean Sea.

Turkey's plans to send a seismic survey vessel, the Sismik 1, into the Aegean have been opposed by Greece. The two countries are locked in a dispute over Aegean seabed rights.

Press reports have speculated that Greece might try to intervene if the Sismik 1 entered disputed waters.

Mr. Caglayangil said in a radio interview today that "Turkey will not let anyone interfere with its right and if there is any interference, we will reply in kind." The Turkish government would not be held responsible for any problems created by outside interference, he said.

While not mentioning any country by name, observers said that his remarks were clearly aimed at Greece, which claims that its Aegean islands constitute a Greek continental shelf. Turkey says that its Anatolian continental shelf extends midway into the sea.

*For Economic Reasons*

# Zaire Seeks to Mend Fences With Angola's New Regime

By Jonathan C. Randal

KINSHASA, Zaire, July 14 (WP).—Zaire, which backed the losing side in the Angolan civil war, is officially committed to mending fences with President Agostinho Neto's victorious party, which is now running the former Portuguese colony.

Zaire President Mobutu Sese Seko met Mr. Neto at the end of February to lay the basis for cautious future relations.

That meeting, in Brazzaville, the Congolese capital, came soon after Mr. Neto's Popular Movement for the Liberation of Angola (MPLA) won the war with Cuban support against Mobutu-backed factions.

The rapidity of Mr. Mobutu's move indicated that he had little choice but to make up with Mr. Neto's government, which had solid reasons to be hostile to him.

**Undeclared Bankruptcy**

Zaire, in the throes of what bankers privately call undeclared bankruptcy, is strapped by the nearly year-old closure of the Benguela Railroad, linking the copper mines in eastern Zaire with the Angolan port of Lobito.

Copper accounts for two-thirds of Zaire's foreign exchange earnings and in normal times the Benguela Railroad handled 30 per cent of Zaire's copper exports and 80 per cent of the imports for its copper-mining district, especially petroleum products.

Two vital railroad bridges are not expected to be repaired until September at the earliest and a return to normal traffic is believed unlikely before the end of the year.

In return for reactivation of the railroad, Zaire agreed to shut off all help to the MPLA's defeated but potentially annoying rivals, a gesture that allowed Mr. Neto to concentrate on cleaning up resistance in southern Angola.

Despite the initial aura of understanding at that first Brazzaville meeting, the mood is still far short of formal reconciliation. High Zairean officials say that the Luanda authorities, angered by Mr. Mobutu's backing for the other movements, are dragging their feet.

A second expert-level meeting took place in Luanda and a final meeting to complete normalization of relations is expected.

"Whenever the Angolans are ready," Mr. Mobutu said in a recent interview.

Impeding their relations are Angolan complaints about incidents inside Angola allegedly involving soldiers of the defeated National Front for the Liberation of Angola (FNLA) based on Zairean territory.

**Apparent Anomalies**

Luanda is also suspicious of such apparent anomalies as the continued use of Kinshasa for mailing propaganda of the other unsuccessful liberation movement, the National Union for the Total Independence of Angola (UNITA).

Reports of occasional clashes between Cabinda, the Angolan enclave in Zairean territory, and a liberation front that Kinshasa used to back have also contributed to Angolan uneasiness.

Just before the arrival of Cuban troops tipped the scales decisively in the MPLA's favor, Mr. Mobutu and Congolese President Marien Ngouabi allegedly agreed to defend, at the United Nations, the oil-rich enclave's right to self-determination.

The assumption was that they would share in the enclave's 150,000-barrel-a-day production (compared to the 30,000 barrels a day for the Congo and 25,000 barrels a day for Zaire).

Under terms of the Brazzaville agreement, both Angola and Zaire pledged to respect each other's sovereignty and territorial integrity, to abstain from interfering in each other's internal affairs, to guarantee the return of refugees and their freedom from reprisal and to avoid "any military activity from their soil against neighboring countries."

Zaire also agreed to stop letting mercenaires pass through its territory on their way to Angola and to close down offices and operations here of both rival Angolan movements.

Zaire claimed that as many as a million Angolans were refugees in Zaire, although many have lived there for generations.

In fact, Zaire was really worried, despite official disclaimers, about the presence just inside Angola of about 6,000 former Katangan gendarmes. They had fought for the MPLA in part to spite Mr. Mobutu, who as army commander had helped end the secession of Katanga more than a decade ago.

The FNLA bases were closed down after the Brazzaville meeting and when the front's leader, Holden Roberto, issued a communiqué blaming Mr. Mobutu for his defeat and claiming that his men were still operational in Angola, Mr. Mobutu sent 800 gendarmes to sack the office and burn its archives. Mr. Roberto is still allowed to live in Kinshasa, but is in political eclipse.

Zaire has its own problems with Angola, which wants more money for letting the railroad pass through its territory. The previous agreement, concluded by the Portuguese colonial authorities, is no longer valid, Luanda says.

Zairean officials admit that they have made no progress in trying to condition the agreements on the departure of Soviet advisers and Cuban troops from Angola.

# Norway Thinks Netted Sub Was Russian

OSLO, July 14 (Reuters).—The submarine caught in the net of a Norwegian trawler in the Barents Sea on July 1 was probably a Soviet nuclear-powered vessel, the Defense Command said today after a study of pictures taken by fishermen.

Crew members of the trawler Sjoevik said that while fishing in the Arctic they felt a violent tug, and the ship was pulled astern at full speed.

Soon afterward, an unmarked submarine surfaced and its crew cut the trawl wire that was caught in its fins. The submarine then moved toward the Soviet coast. It was photographed.

# Tension Increases in Djibouti As Independence Vote Nears

By Michael T. Kaufman

DJIBOUTI, French Territory of Afars and Issas, July 14 (NYT).—Political maneuvering and frictions are increasing as the people of this territory, France's last possession on the African continent, move toward a referendum on the issue of independence.

The territory, a barren rocky area with a total population of 220,000, has been dominated for the last 16 years with French support by Ali Aref Bourhan, president of the Council of Ministers.

Rioting between members of the Afar and the Issa tribes last weekend left 15 persons dead and more than 65 wounded, French authorities said, according to AP.]

As the French move toward carrying out their decision, announced at the end of last year, of granting independence to the territory, Mr. Aref's power has eroded sharply and his remaining public supporters feel that the French have cut the ground from under him. The referendum is expected to be held in January or February.

A year ago, Mr. Aref, who is a member of the Afar people, had the support of all 40 members of the Chamber of Deputies, most of them members of his Union and Progress party. The party has championed continuing close ties with France, a slow course toward independence and the continued presence of the French military—5,000 soldiers, sailors and legionnaires. Now 19 members have defected and are calling for his removal as president of the council.

**Puppets' Accused**

In Paris recently, Mr. Aref charged that it is no longer France that rules the territory but Somalia—through its "puppets." He meant the African Popular League for Independence, an organization made up largely of Somali-speaking Issas who demand independence quickly and the removal of the French.

Neighboring Ethiopia, which has formally renounced what it regarded as its historic claim to this territory, is similarly charging that Somalia is using puppets here to prepare the way for eventual annexation. The territory, which is at the southern entrance to the Red Sea, is bounded by the sea and by Somalia and Ethiopia.

Since Ethiopia's major outlet to the sea is a railroad to the port of Djibouti, Ethiopian officials are keeping an anxious eye on developments here. Some are saying privately that any threat to the railroad, which carries 80 per cent of Ethiopia's imports and exports, would be a probable cause of war.

Somali officials deny that they want anything more than an independent territory where the rights of Somali-speaking inhabitants will be protected.

**Guarantees Sought**

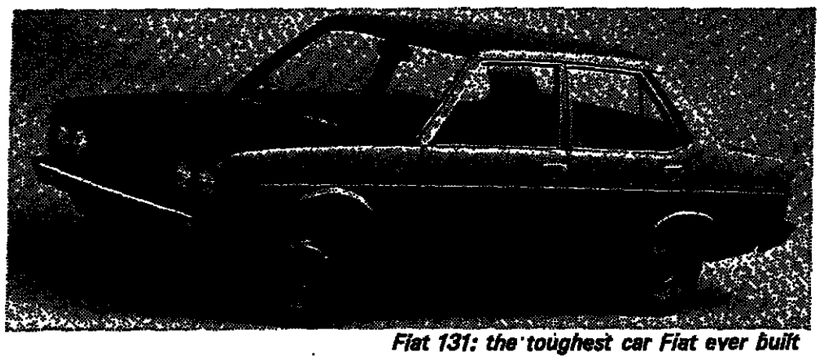

"The Ethiopians want guarantees," said Dahir Hussein Dirir, a native of Djibouti who is the Somali consul in Nairobi.

"But they already have the best possible guarantee in the railroad."

Noting that the entire economy of the territory is dependent on transit fees from Ethiopia, he asked, "Why should anyone endanger this?"

Ethiopian officials brush aside such arguments. Instead they note with concern that at a recent meeting of the Liberation Committee of the Organization of African Unity, the Somali representative filibustered for 13 hours in an attempt to block adoption of a resolution calling on all African countries, most particularly Somalia and Ethiopia, to guarantee the independence of the territory once the French leave.

# Reagan Bars Challenges to Ford's Delegates, Asks the Same

By Warren Brown

WASHINGTON, July 14 (WP).—Ronald Reagan told his campaign staff yesterday to abandon any plans to unseat President Ford's delegates to the Republican National Convention.

The former California governor said that he issued the order "in the interest of Republican party unity," and urged Mr. Ford to give similar instructions to his campaign staff and supporters. It was not clear whether Mr. Reagan would withdraw his order if Mr. Ford did not agree.

Mr. Reagan and the President are involved in an intense delegate battle that has strained relations within the party and threatens to disrupt the GOP convention in Kansas City next month. According to the latest Washington Post count, Mr. Ford has 1,058 delegates to Mr. Reagan's 1,010. A total of 1,130 delegate votes are needed for nomination.

Wooing uncommitted delegates is one way either can improve his total. Another method is for one candidate to strip delegates from the other by successfully challenging the delegates' credentials.

**Procedural Haggling**

Mr. Reagan said that this tactic must be abandoned to avoid "the divisive kind of procedural haggling at our convention which would make it difficult to unite the party behind our national ticket and which would reflect poorly in the eyes of those Democrats and independents whose support we seek."

He added: "This year's delegate selection process has worked fairly and well. The delegates selected so far are a legitimate, representative cross section of the Republican party and I have complete confidence in their ability to choose the most able, most electable Republican presidential candidate."

Rogers Morton, Mr. Ford's campaign director, said through a spokesman that the President Ford Committee "applauds Gov. Reagan's decision not to file credentials challenges and welcomes the announcement by the Reagan committee to join with us in avoiding divisive battles at the convention."

However, Mr. Morton said that he was puzzled by the Reagan announcement because it came one day after the Citizens for Reagan Committee challenged Ford delegates in Ohio. "We hope that the Reagan forces will abide by today's statement and not by yesterday's action," Mr. Morton said.

James Lake, Mr. Reagan's national press secretary, said that Mr. Morton was mistaken about the Ohio challenge. He said that the action was not initiated by the Reagan organization.

*Texan Wins Nationwide Acclaim*

# Hailed for Speech, Rep. Jordan Still Bars Running With Carter

By Stan Hinden

NEW YORK, July 14 (WP).—Barbara Jordan had not slept much. The words and phrases of her keynote speech Monday night kept whirling through her mind. The cheers and applause of the delegates to the Democratic National Convention echoed in her ears as she tossed and turned.

"I'm still a little weary from the evening," she said yesterday. "I was very fired up by giving the speech and by the audience response and it took just a little while to come down—enough to keep me from sleep a couple of hours."

Now, it was the day after and the returns were coming in. The vote was heavy and favorable. On the coffee table in front of her were scores of congratulatory telegrams from all over the country. The telephones were ringing in her congressional offices in Washington and Houston. And overnight, there was a boom to nominate Texas's Rep. Jordan, 4th, for vice-president.

For Rep. Jordan, the night—and the day after—were reminiscent of July 25, 1974, when she delivered a powerful speech to the House Judiciary Committee, by TV to the nation, on the impeachment of Richard Nixon. Then, too, public approval rolled in.

The enthusiastic reception for the Jordan keynote address prompted leaders of the Black Caucus to talk of asking Rep. Jordan to reconsider her decision of several weeks ago to withdraw as a vice-presidential possibility. She had been on Jimmy Carter's original list of potential nominees.

**Reaffirmed Decision**

"I hope not," she said, when asked whether a vice-presidential boom was in the making. Later in the day, after talking with Black Caucus members, Basil Paterson, vice-chairman of the Democratic National Committee, and Rep. Yvonne Burke of California, Rep. Jordan reaffirmed her decision not to be considered for the job.

She said that she did not approve and did "not sanction" efforts to put her name in nomination. She called Mr. Carter's method of choosing a running mate "a good process," and added, "I am certain that I can support the finalist." Rep. Jordan said that she believed that Mr. Carter had done well by blacks and "would not have excluded me on the basis of race."

Mr. Carter was among the first to telephone his good wishes on the keynote speeches, reaching her at the convention hall shortly after she concluded with Abraham Lincoln's words: "As I would not be a slave, so I would not be a master."

This morning, Sen. John Glenn of Ohio, whose own keynote speech was greeted by delegates with much less enthusiasm, called the reception accorded Rep. Jordan "tremendous." He added, "She has obviously become a symbol for a lot of things the Democratic party is striving for."

A sampling of the telegrams included:

"Congratulations. You would have been elected on the first ballot tonight."

"That's the best way I've heard the American dream expressed since I've been born."

"Congratulations. You are wonderful. I am recently a Republican. I will be a Democrat."

Sitting in her hotel room, her eyes weary, but otherwise looking fresh, Rep. Jordan reflected on the months of thought and preparation that had gone into her keynote address.

**Key Words, Four Drafts**

First, she said, there had been the key words—"people," "inclusive versus exclusive" and "equality"—and then there were the four drafts with speechwriter Kevin Sullivan and then the full reading of the speech twice.

"I don't usually read a speech aloud," she acknowledged. "I haven't done that since I was a high school debater."

Two hours before the speech, she was nervous. "Then, when I started to watch the convention on the tube, I wanted to be there and wanted to give my speech and by the time I mounted the podium I wasn't nervous."

It was, Rep. Jordan said, entirely possible that she might be offered a job in a Carter administration. "I don't know what that something would be. But I think that is a realistic possibility."

Whether she accepted, she said, would depend on what was offered.

Associated Press.

**SAYING HI—Jacqueline Kennedy Onassis acknowledging greetings as she attended the Democratic National Convention. With her was party's chairman Robert Strauss.**

# Democratic Platform of 1976: Highlights of Party Program

NEW YORK, July 14 (NYT).—*Here are the chapter-by-chapter highlights of the platform adopted this morning by the Democratic National Convention:*

**1. Full Employment, Price Stability and Balanced Growth.**

Planning. Set annual targets for employment and inflation; make the Federal Reserve System responsive to the goals of the president and Congress; keep interest rates low; coordinate tax, spending and credit policies.

Employment. Guarantee jobs to all Americans who want to work; reduce the adult unemployment rate to 3 per cent within four years.

Inflation. Emphasize increased production to keep inflation under control and publicize anti-inflationary activities by business and labor.

Taxes. Continue anti-recession tax cuts; reform the tax system to eliminate unjustified tax shelters and require the wealthy to pay a fair share of taxes.

Labor. Support repeal of federal law *permitting state right-to-work statutes*; allow construction workers to picket entire building sites.

**2. Government Reform and Business Accountability.**

Public sessions. Hold open meetings by government commissions and agencies.

Appointments. Choose judges and regulatory commissioners on the basis of their qualifications.

Campaign finance. Enact public financing of congressional campaigns.

Consumers. Involve the federal government more actively in protecting consumers.

**3. Government and Human Needs.**

Health. Enact a comprehensive national health insurance system, financed by a combination of employer-employee payroll taxes and general revenues.

Welfare. Combine existing welfare programs into a single "income maintenance" payment to the poor, "substantially financed by the federal government"; require persons able to work to do so or lose welfare benefits; accomplish a federal assumption of local welfare costs and a phased reduction of state costs.

Women. Adopt the Equal Rights Amendment.

Abortion. Oppose a constitutional amendment outlawing abortion.

Busing. Encourage other means of desegregating schools, but maintain busing as a "judicial tool of last resort."

**4. States, Counties and Cities**

Housing. Increase production of low and moderate-income housing.

New York. Undertake a "massive effort" to help New York City and other "older cities" solve their fiscal problems.

Guns. Curtail availability of handguns; permit use of guns by sportsmen; impose mandatory sentences on persons committing crimes with guns.

Transportation. Permit more flexibility in the use of federal transportation funds and allow a larger share of highway money to be used for mass transit.

**5. Natural Resources and Environmental Quality**

Energy. Continue control of crude oil and natural gas prices; seek alternative sources of power; minimize dependence on nuclear power and apply stronger safeguards against accidents; place "effective restrictions" on oil companies' owning all phases of the oil industry and enact a "legal prohibition" on ownership of industries involved in competing forms of energy.

Agriculture. Maximize farm production and assure fair profits to farmers.

Environment. Establish uniform, vigorously enforced environmental protection laws and regulations.

**6. International Relations**

Détente. Pursue better relations with the Soviet Union, but strengthen ties with traditional allies and Third World nations.

Multinationals. Prevent multinational corporations from engaging in corrupt practices and interfering in the political systems of foreign countries.

Arms control. Place limitations on arms sales abroad and work for arms control and nuclear disarmament, but maintain strength at least equal to that of the Soviet Union.

Defense. Reduce the Pentagon budget by $15 billion to $17 billion a year, but maintain a strong military and nuclear deterrence.

Mideast. Continue consistent support of Israel; avoid imposition of externally devised settlement of the Middle East conflict.

# Democrats Adopt Party Platform

(Continued from Page 1)

lutely certain it succeeds," he said.

"No one who sits out a campaign can complain about the bitter fruits of defeat," he added.

Working a turn on one of President Ford's radio commercials attacking Ronald Reagan in California this year, Sen. McGovern continued:

"Gov. Carter cannot enact the Democratic platform; President Carter can."

Mrs. Jacqueline Kennedy Onassis, making her first appearance at a national convention since 1956, spent about half an hour in a front-row seat above the Minnesota delegation. She rose twice and smiled when the big crowd applauded.

As for Mr. Carter, he remained in almost complete seclusion all day at his headquarters in the Americana Hotel. There was scarcely a word from him or his entourage about the one unanswered question hanging over the convention: Who is his choice for vice-president?

But every sign pointed toward either Sen. Walter Mondale of Minnesota or Sen. Edmund Musk Minnesota or Sen. Edmund Muskie of Maine. One member of the former Georgia governor's inner circle said he would be "stunned" if it was anyone else.

**Odds for Mondale**

Robert Strauss, the party's national chairman, said he would "shade it, about 6 to 5," toward Sen. Mondale.

A pol of the Carter staff was overwhelmingly pro-Mondale.

Sen. John Glenn of Ohio appeared to have been eliminated from contention, although no one could be sure.

As the former astronaut came off the convention floor Monday night after delivering a keynote address that appeared to have been poorly received, Hamilton Jordan, Mr. Carter's campaign manager, said with a broad smile:

"Well, we know now who we don't want for vice-president, don't we?"

Sen. Muskie stirred no greater excitement in his remarks last night.

Normalyl, the feature of the second evening of a nominating convention is the platform debate. Robbed of its drama by agreement on virtually every issue within the Resolutions Committee the "debate" consisted of presentations by 17 prominent Democrats, carefully chosen to suggest a kind of unity and strength through diversity.

Diverse they were—Jerry Wurf, the labor leader, on the left, and Gov. George Wallace of Alabama on the right; Sen. Frank Church of Idaho for the doves and Adm. Elmo Zumwalt for the hawks; Mayor Richard Daley of Chicago from the old guard and Paul Sarbanes, the senatorial candidate in Maryland, from the new breed.

"We cannot lose sight of the fact that our nation's essential task is the promotion of better lives, not bigger guns," Adm. Zumwalt said, sounding far tamer than he sometimes does.

"The monster bureaucracy," said Gov. Wallace, "is driving people in this country nuts. It should get off their backs and out of their pocketbooks."

In a poignant farewell to national politics, at a convention ready to nominate a spokesman of the New South, Gov. Wallace was subdued and at times almost inaudible.

"Some of you laughed at me," he said of his anti-Washington rhetoric, "but now you're saying it."

Only one platform plank was actually debated. It dealt with the Hatch Act, and the delegates approved by voice vote a minority proposal urging revisions to give federal employees more leeway to participate in politics.

# Mars Landing Set Tuesday On New Site

## Viking Craft Is Aimed For Plains of Chryse

By Thomas O'Toole

PASADENA, Calif., July 14 (WP).—The Viking spacecraft in orbit around Mars has been targeted to land Tuesday on a flat plain of the planet at the western edge of the Plains of Chryse.

The unmanned, three-legged Viking is to land on Mars when it is late afternoon on the Plains of Chryse. The unpredictable Martian winds will have abated and there will be still enough sunlight for the spacecraft's cameras to take at least two pictures of the surface and transmit them back to earth before nightfall.

"This landing site represents the best of all the sites we have looked at," Viking project manager James Martin jr. said yesterday. "We are now on a landing timetable."

The site is the fourth photographed by the four-ton Viking, which went into orbit and started making pictures of potential landing sites almost a month ago. The site lies more than 800 miles northwest of the original site in the Valley of Chryse, which Viking found to be covered with huge craters, long high ridges and a chain of ancient islands as high as a mile above the surrounding plains.

The only major hazard anywhere near the landing site is a long ridge of the southwest. Radar echoes suggest that the site is composed of hard basaltic rock.

For four days, earlier this month, the earth's most powerful radar antenna at Arecibo in Puerto Rico sent signals across the Plains of Chryse, more than 200 million miles away, and produced a map of the region from the resulting echoes.

# U.S. Indicts Seven In Press Riot at Washington Post

WASHINGTON, July 14 (AP).—A federal grand jury indicted seven pressmen today on charges of rioting and destroying property at the start of a strike at The Washington Post last October.

The strike has not been settled; The Post has continued to publish.

The defendants are members of Local 6 of the Newspaper and Graphic Communications Union. The indictment said that the defendans "willfully engaged in a riot" and "maliciously caused and attempted to cause injury and destruction to portions of the pressroom and machinery" at the newspaper plant.

Neither The Post nor the union had immediate comment.

If convicted on the destruction of property charge, each defendant faces a maximum penalty of 10 years in prison and a $5,000 fine. The riot charge carries a maximum of a year in prison and a $1,000 fine.

## *Chile Regime Creates New Advisory Group*

SANTIAGO, July 14 (UPI).—Chile's military government today created a Council of State, a top-level advisory body to President Augusto Pinochet.

The 18-member group, headed by former Presidents Jorge Alessandri and Gabriel Gonzalez Videla, will serve as a consultive body in matters of national interest. Another ex-president, Eduardo Frei, a Christian Democrat, refused to join the group.

## French-Soviet A-Pact

MOSCOW, July 14 (Reuters).—French Foreign Minister Jean Sauvagnargues will arrive here tomorrow on a 24-hour visit to sign a French-Soviet agreement to prevent either country from accidentally launching a nuclear attack on the other.

Toward International Guidelines

# *12 Nations Hold Secret Talks On Exploitation of Antarctica*

By Clyde H. Farnsworth

PARIS, July 14 (NYT).—Twelve countries have just concluded a secret meeting here on possible exploitation of Antarctica's mineral resources after 1989. The 12 agreed in 1959 to suspend territorial claims for 30 years so the continent could be reserved for scientific research.

The meeting—and others that will follow in London next year—was called to work out a set of international procedures to be applied when governments or multinational corporations feel there is sufficient economic incentive to tap the continent's mineral wealth.

"This is not for tomorrow," a Western scientific analyst said, "but should the time arise, all signatories to the convention feel it best to have an agreement prescribing the conditions."

The issues are ecological, legal and political—all of such sensitivity that the 12 countries, including the United States and the Soviet Union, decided against issuing any communiqué or even signaling the presence of their representatives in Paris.

**Preparatory Meeting**

Technical experts, supported by diplomatic personnel, were gathering at the Paris Conference Center for two weeks. The head of the U.S. delegation was Robert Hughes of the National Science Foundation in Washington, which is the primary agency responsible for scientific policy questions.

It was described as a special preparatory meeting to examine all questions of mineral resource activities in Antarctica before a higher-level consultative meeting of the nations that signed the treaty takes place in London toward the end of next year.

Because of the complexities of the issues, a further preparatory meeting was scheduled in London before what would be the ninth consultative gathering of the treaty nations. They have met every two years since 1959.

At the eighth consultative meeting last June in Oslo, governments agreed to study the question of minerals in the Antarctic in light of the quadrupling of oil prices in 1974 and the speed of technological advances in cold-weather oil extraction procedures.

**Amounts Unknown**

No one knows how much oil, coal or other minerals the Antarctic might contain. In view of discoveries above the Arctic Circle in the north, in Canada and Alaska, the amounts could be considerable.

The United States Geological Survey has reported the existence of possible oil-bearing strata in Antarctica. There is no corresponding land mass in the north.

The signatories to the 1959 convention are the countries that maintain permanent stations in Antarctica for scientific research.

These are Argentina, Australia, Belgium, Chile, France, Japan, New Zealand, Norway, South Africa, the Soviet Union, Britain and the United States. In addition, 20 or so more countries maintain temporary stations during the Antarctic summer.

By trying to establish agreed procedures, the treaty nations are now seeking to check any future land grab that could be disastrous for world stability and ecological balance, analysts said here.

The hope, they noted, is to prevent the type of chaotic situation that now prevails in questions of exploration of the resources of the oceans. Efforts to establish a "law of the sea" have so far been a notable failure.

"There is a general sense of the treaty partners," a conference participant said, "of responsibility to move ahead."

# Belgian Company Gets Contract on F-16 Components

ST. LOUIS, July 14 (UPI).—General Dynamics announced another large foreign co-production contract today on the F-16 fighter plane program.

Fairey of Belgium was awarded a $97.8-million order for components and assembly work on 116 aircraft to be used by Belgium and other countries.

General Dynamics gave a similar contract of $190 million yesterday to the Dutch Fokker Co. for work on F-16s for the Dutch and Norwegian Air Forces.

Pratt & Whitney Division of United Technologies of Hartford gave Norway's Koengsberg Vaapenfabrik a $163-million order for work on jet engines for the F-16.

Four European countries are buying up to 348 of the planes. The U.S. armed forces have ordered 650.

# *California Acts To Help Poor on Utility Bill Rates*

SAN FRANCISCO, July 14 (AP).—California has adopted a new price structure for household energy that penalizes heavy users and gives a break to the poor on their utility bills.

The "lifeline" formula was approved yesterday by the state Public Utilities Commission. The formula cuts the cost for the minimum amount of electricity and natural gas needed to cook meals, heat and light a home, heat water and refrigerate food.

Above the minimum amounts of gas and electricity, which apply to all utility customers, the price will increase and the unit price rises as more energy is used. Rates for "lifeline" amounts of energy will be frozen while rates for greater amounts will be allowed to rise until they are 25 per cent higher.

"It's a complete shift in philosophy, giving lower rates to people who use only a small amount of energy instead of granting substantial discounts to big users," a spokesman said.

# Canada Limits Death Penalties

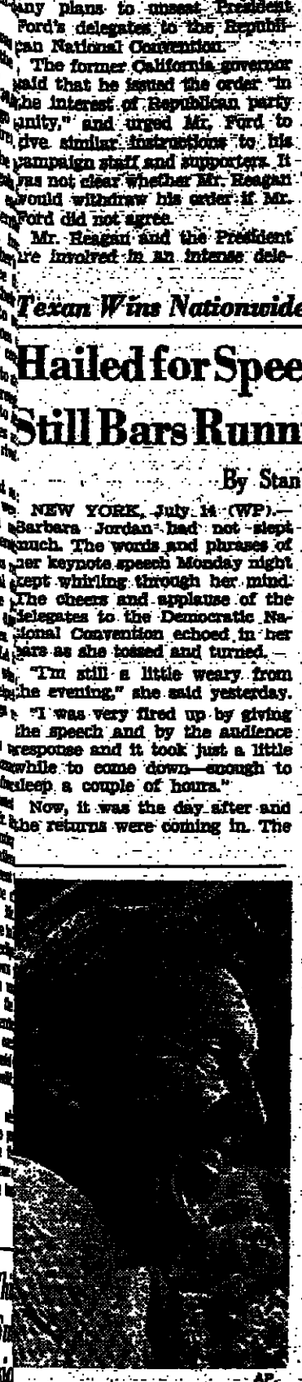

OTTAWA, July 14 (AP).—The lower house of the Canadian Parliament voted 131 to 124 today to abolish the death penalty for all civilian crimes.

Still subject to capital punishment are a number of offenses under the National Defense Act.

The new law, to become effective as soon as it is approved by the Senate and given routine royal assent, will replace the present law, which calls for the death penalty for killers of working policemen and prison guards

## Commuter Crash Kills 2

NEW CANAAN, Conn., July 14 (AP).—Two Conrail commuter trains, one carrying about 300 passengers and the other carrying only a crew, collided near the station here last evening, killing 2 women and injuring 29 other passengers.

# Sen. Scott Sees No U.S. Change In China Policy

PEKING, July 14.—Sen. Hugh Scott, the Senate minority leader, predicted yesterday after talks with senior Chinese officials that there will be no significant change in U.S.-China relations before the next U.S. administration takes office in January.

"Between now and January, there are conditions in China which involve a continuation of their struggle; there are conditions in the United States which involve a somewhat different kind of struggle," the Pennsylvania Republican said in an allusion to the U.S. presidential campaign.

Sen. Scott's remarks were in contrast to predictions in the United States that President Ford is considering moving toward diplomatic recognition of China before or after the November presidential election.

The senator spent two hours yesterday in discussions with Vice-Premier Chang Chun-chiao, the fifth ranking member of the Chinese Communist party.

Sen. Scott and his entourage left Peking today for a tour of northeast China and the Shanghai-Suchow area.

## Italian Gets EEC Post

BRUSSELS, July 14 (Reuters).—Cesidio Guazzaroni, 66, an Italian career diplomat, today took over the post of commissioner for industry, for the European Economic Community, replacing Altiero Spinelli, who was elected to the Italian Parliament last month.

## *Ford Turns 63 In Good Health*

WASHINGTON, July 14 (UPI).—President Ford got an "excellent health" report from his doctor for his 63d birthday today and was taken out to lunch by his wife Betty.

"The results of the laboratory tests and physical examination today were completely normal and I have found the President to be in excellent health," Dr. William Lukash reported after the semiannual, 40-minute checkup.

Dr. Lukash said Mr. Ford has had no ailments this year except "mild discomfort in his knee [injured while playing college football] following periods of prolonged standing."

# U.S. Charges Trade Unit Is Japan Lobby

## Suit Claims Council Is Propaganda Arm

By John F. Berry

WASHINGTON, July 14 (WP). —The U.S.-Japan Trade Council, which identifies itself as an association to promote trade between the two countries, is actually a propaganda arm of the Japanese government, according to the Justice Department.

In a civil suit filed yesterday, the department charged the Washington-based council and its U.S. principals with fraud in violation of the Foreign Agents Registration Act.

Also charged were the Japanese trade promotion office in New York City and three officials of that organization.

The act states that agents for foreign countries must register with the Justice Department and file semi-annual reports describing their activities and pay.

The suit claims, in effect, the council has filed false reports and has misled subscribers to its publications, including many major U.S. corporations.

The council, the suit said, did not confine itself "to promoting trade between the two countries" but instead engaged in lobbying, "principally in the area of defeating protectionist trade policies and legislation in this country affecting Japan."

Named as defendants were Nobel Hemmendinger, a founder of the council in 1957, and Allen Taylor, executive director. Mr. Hemmendinger called the government lawsuit unnecessary and unfair.

According to the suit, Mr. Hemmendinger and others set up "sham contracts" as part of a "scheme to funnel more than $6 million between the Embassy of Japan and the council" from 1957 until the present.

The department alleges that the Japanese Trade Promotion Department in New York was created by the defendants to hide the flow of funds to the council from the embassy.

The department seeks to enjoin the defendants from further violations of the Foreign Agents Registration Act. It wants the principals to tell who they really represent and what they do for their clients. It calls for the council to notify Congress and governmental agencies about the suit, and to sponsor advertisements informing the public of the action.

The department is also demanding the names of journalists, congressional staff members and other officials who, according to the suit, went on expense-paid trips to Japan.

United Press International

IRKED BY SKIRTS—Lt. Debra Baughman is a military policeman in the U.S. Marine Corps—one of four women MPs at Camp Lejeune, N.C. They are assigned the same duties as their male counterparts. Here she is adjusting the cap of one of the men under her command: she says they seem to have accepted her. What irks her is the regulation requiring women Marines—MPs or otherwise—to wear skirts: "It's hard running and jumping and hurdling fences in a skirt."

*As Pullout Deadline Nears*

# GIs Rushing to Get U.S. Visas for Thai Wives

By Lewis M. Simons

BANGKOK, July 14 (WP).—With less than a week to go until all U.S. troops must be out of Thailand, there is a mad scramble at the U.S. Consulate here as the last few GIs try to get their Thai wives and fiancées visas to enter the United States.

When the last troops leave next Tuesday, 14,000 Thai women will have gone to the United States with GI husbands since the U.S. military buildup began here 12 years ago. At the peak, in 1965, there were some 50,000 U.S. servicemen in this country, supporting the war in Indochina.

The L-shaped consulate building, a few blocks from the sprawling Joint U.S. Military Advisory Group (JUSMAG) headquarters on busy Sathorn Road, is crammed each morning. Soldiers and airmen and their wives pore over an often bewildering array of U.S. Immigration Service forms.

**Overtaxed Staff**

Some have been coming here for weeks, waiting for the big moment—an appointment with a consular official who grants the visas. The consular staff, even though it has been augmented temporarily by JUSMAG clerks, is overtaxed. In the fiscal year which ended last month, the consulate issued visas to 3,019 Thai wives, a 50-per-cent increase over the previous year. Appointment applications are now backed up until next September.

The pressure has taken its toll on nerves and tempers. A number of servicemen complained of shabby, inconsiderate treatment. Some said that consular officials have cast aspersions on their wives' morals. But others said that they appreciated the difficulties the staff faced.

There are petitions to the U.S. Immigration Service, Thai police checks, birth certificate and passport checks, and interviews to determine whether the women have medical, moral, criminal or political records which would exclude them from entering the United States.

As a consulate official said, some couples were unrealistically optimistic. A number of Thai women found themselves "totally out of their element," in the United States, he said. "They encounter enormous adjustment problems and culture shock, even when they're well-educated. When they're illiterate, as many are, not just in English but in Thai, it's even rougher. They have no one to turn to, no frame of reference," he added.

**Years of Difficulty**

Although officials realized that many couples faced years of difficulty, neither the consulate nor military commanders try to discourage GIs from marrying Thai women and taking them to the United States, the consular officer said.

Many GIs are attracted by the fragile beauty of Thai girls. The girls, in turn, are attracted by what they believe will be a better life for them and their children. "When you've been earning $50 a month and you marry a soldier who earns $500 or $600 a month, that's attraction enough," the official said.

The most common problem the consulate has come across in clearing women for entry into the United States is how to deal with those who have police records as prostitutes.

This reflects the circumstances under which many GIs and Thai women met in this conservative, Buddhist country where mixed marriages are frowned on.

During the height of the war in Indochina, hundreds of thousands of U.S. military personnel came to Bangkok for brief rest and recreation holidays. Bars and massage parlors flourished to meet the demand.

The women who worked in these places were frequently very beautiful. The men, often just out of their teens, were lonely. Casual relationships quickly became working arrangements and many of these developed into marriages.

It was possible for GIs in Thailand to meet women other than bar girls, but it was not usual.

The consulate tends to be lenient in examining the women's police records. "We know that a girl who was a cashier in a massage parlor would be arrested along with everyone else in a raid," an official said. "If we're convinced that an arrest was discrete—one time only—then we generally tend to look the other way. After all, we're not looking to keep people out."

# Citizens' Band Radio Craze Causes U.S. Electronic Chaos

By Les Brown

NEW YORK, July 14 (NYT). —The explosive growth in citizens' band radio (CB) in the United States during the last 18 months, with new enthusiasts emerging at the rate of 500,000 a month, has been accompanied by a voluminous catalogue of complaints to the Federal Communications Commission about interference with other electronic devices, ranging from church organs to automotive ignition systems.

Among what the commission describes as "CB horror stories" are reports of automatic garage doors responding to the spillover energy from CB transmissions, phonographs and public address systems picking up CB broadcasts and television pictures suffering severe disturbances.

Despite these problems, the FCC is expected next month to expand the number of channels available to CB users from the present 23 to as many as 40 or even 46. This would be done ostensibly to alleviate the congestion on the available CB channels, a traffic jam that worsens week by week as thousands more join the 12 million persons already caught up in the two-way-radio craze.

But the commission believes that the addition of channels may actually be the key to reducing the capricious interference caused by the four-watt CB units.

**Boom Unforeseen**

In the view of the commission's engineering experts, much of the problem stems from equipment manufactured under FCC technical standards for CB radio that were adopted in 1958, when the boom was not foreseen.

This equipment is designed to use only the 23 present channels and not the additional ones proposed by the FCC.

New equipment would have to be manufactured to transmit and receive over the full range of channels that would become available and that would tend to slow the sale of the CB sets now on the market.

"Expansion could bring in a whole second generation of equipment. This would be the time to tighten up our specifications," said Robert Luff, engineering assistant to Richard Wiley, chairman of the FCC.

Mr. Luff pointed out also that the need for new equipment would enable such major domestic manufacturers as RCA Corp. and Motorola to penetrate a market that is dominated by cheap imports.

"These are companies with a long-term investment in communications. They are more likely to be responsive to the technical standards we establish than are importers who have never had to deal with the FCC before," he said.

**Equipment Checked**

Mr. Luff, who considers the commission's present technical standards for CB to be ineffective, said that a spot check by the agency of CB equipment now being sold found that much of it did not even meet those standards.

He noted that the extraordinary workload at the commission caused by the CB radio boom had made it difficult to enforce the minimum specifications. "We had to put the importers and manufacturers on the honor system," he said.

"When CB radio took off, it caught the manufacturers as well as ourselves by surprise. Everyone started cutting corners for mass production and lowered their quality control. But even if everyone conformed to the standards, there would still be an interference problem," Mr. Luff said.

In every form of radio, a transmission over an assigned frequency carries a certain amount of noise that spills over into other frequencies. This is known to engineers as RF interference (the letters standing for radio frequency) or more commonly as "garbage." Usually, it can be reduced through some manner of shielding.

**Not Enough Shielding**

Mr. Luff said the commission is not convinced that the interference problem is wholly the fault of the CB radio sets. Many of the electronic products that are affected by the frequency energy radiated by CB units are susceptible to interference because they were built without the necessary shielding parts.

Recognizing this problem, a bill has been introduced in Congress that proposes to give the FCC regulatory authority over all electronic equipment.

Although the commission is straining under the avalanche of applications for CB licenses, it continues to be responsive to the growing interest in citizens' band communications.

The FCC has been trying to encourage its use since 1952, because the CB broadcasts, which normally can travel 8 to 10 miles, put radio at the disposal of the average citizen.

"It took us 16 years to get our first million licensees for CB and only 18 months to get the second million," Mr. Luff said.

# Dacca Steps Up Relief for 200,000 In Flood Region

DACCA, July 14 (Reuters).—Relief teams stepped up the evacuation today of about 200,000 persons marooned by monsoon floods in northeastern Bangladesh, officials said.

They said that floods were engulfing new areas because more rivers had overflowed, swamping at least six villages in the Netrakona district.

Government sources said that the overall situation was still under control but the full thrust of the monsoon floods had not reached its peak.

**Flooding in Mexico**

MEXICO CITY, July 14 (UPI). —More than 50,000 persons were trapped late yesterday by floods that inundated thousands of square miles, the government said.

Torrential rain, which has fallen nonstop for 10 days from the Pacific to the Gulf Coast, caused dams to burst and rivers to overflow. The rain has ruined hundreds of acres of crops and caused the deaths of at least two persons, it was reported.

**Lisbon Bomb Blasts**

LISBON, July 14 (Reuters).—Four bomb blasts destroyed two high-tension power pylons and damaged a third on the outskirts of Lisbon early today, police said. There was no indication who was responsible.

# News Pool Plan Is Approved at Nonaligned Talks

NEW DELHI, July 14 (AP).—Sixty nonaligned countries have approved an Indian draft declaration on the formation of a news pool.

The document was approved at a conference here attended by media representatives and 30 information ministers from Asia, Africa and South America.

The declaration, drafted by the leader of the Indian delegation, Mohammed Yunus, emphasizes the need for a new information agency to "decolonize" international news flow.

Mr. Yunus worked on the text in close cooperation with Yugoslavia and Tunisia, the Indian National News Agency said.

As envisaged, the pool would encourage the coordination of news, photos, radio, television and films within the nonaligned world.

Mr. Yunus has said it would be designed as a supplement to existing information sources, not as a commercial competitor.

# Navy Will Alter Philippine Drills

MANILA, July 14 (AP).—The U.S. Navy said today it will use only dummy bombs in its exercises while investigators check on reports that Navy practice bombing killed six Filipino fishermen last month.

A Navy spokesman also said there was no bombing exercise today and that he did not know if exercises were scheduled later in the week.

The Philippines has demanded a halt to the bombing exercises on the western Luzon coast until more effective safety measures are agreed upon. The demand followed press reports that six fishermen were killed and two injured on three separate occasions near the Navy practice range near Subic Bay Naval Base, 55 miles northwest of Manila.

# Thailand Accepts Bid From Vietnam on Ties

BANGKOK, July 14 (Reuters) —Thailand has accepted Vietnam's invitation to send a delegation to Hanoi for talks on establishing relations, Foreign Minister Pichai Rataknl said here today.

Mr. Pichai, who is expected to lead the Thai group, said that he hoped to be able to go to Hanoi next month. The exact date has not been fixed.

# Home Burned In France of Former Nazi

## Charred Corpse Found Believed to Be His

VESOUL, France, July 14 (Reuters).—What was thought to be the charred body of a former Nazi officer once sentenced to death for killing 71 U.S. prisoners of war was found today inside his fire-gutted house in Traves, eastern France.

Police held up formal identification of the body pending an autopsy. Former SS Col. Joachim Peiper, 61, served as a member of the general staff of SS chief Heinrich Himmler.

Police said that they believed the fire was started deliberately early today and that the victim may have been shot before the blaze. A rifle and spent cartridges were found in the area. Neighbors reported hearing shots just before midnight.

Peiper moved to the village of Traves six years ago. He kept his identity secret until the Paris press disclosed his presence in France last month. This was followed by death threats and warnings that he should get out of France.

Peiper was sentenced to death for ordering the execution of U.S. prisoners in Belgium during Hitler's desperate Ardennes counteroffensive in 1944. The sentence was commuted to life imprisonment and he was freed from jail in 1956 after serving 10 years.

**Lack of Evidence**

Peiper came to France in 1969 following an appearance before a German court on charges that he killed 34 civilians in Italy in 1943. The court released him for lack of evidence.

After the press disclosures, the former Nazi was the target of a Communist-led demonstration in this small town about 100 kilometers from the German border.

According to local officials, he received death threats from various "patriotic" groups protesting against his presence on French soil. One warning letter said that his home would be burned down.

The mayor of Traves declared that he believed it would be best for Peiper to leave the country, although his presence here was perfectly legal.

Neighbors told police that Peiper sent his wife and son to West Germany last week. He had been working for a car dealer as a public-relations representative.

Questioned by reporters last month about his wartime actions, he replied: "I was not responsible for what I was forced to do while serving my country. Even if I was personally guilty, I paid the price with 10 years in prison."

MAGNETIC—Three of the "tall ships" that crossed the Atlantic for the U.S. Bicentennial's Operation Sail drew overflow crowds when they called at Baltimore. Other ships in other U.S. ports also drew hordes of visitors. The visits will continue during the summer.

UPI.

## Obituaries

# Charles Ritz, 84, Director of the Paris Hotel

PARIS, July 14 (NYT).—Charles Ritz, 84, director of the Ritz Hotel on the Place Vendome here, died on Sunday, according to staff members at the elegant hotel that his father founded 70 years ago. The cause of death has not been disclosed.

No official announcement of his death has been made by the family. Hotel employees reported having seen him up and about as recently as last week.

Mr. Ritz believed in luxury in his hotel—many have called it the most luxurious in the world—but he shuddered at "putting on the Ritz."

His formula depended on service, provided at the luxurious ratio of about 450 employees to the 230 guests.

**Champagne, Card**

"I myself, to be friendly, send each guest a bottle of champagne and my card when he checks in," Mr. Ritz noted in an interview eight years ago, a time when he questioned whether elegance could survive "the vulgar and the nouveau riche."

The hotel was the center of Mr. Ritz's life, but there was also fly fishing.

In 1916, Frank Munsey, a newspaper publisher, hired Mr. Ritz to work at his hotel in New London, Conn.

Then Mr. Ritz went to the Ritz-Carlton in New York City as night manager. He whiled away the night hours by remodeling fishing rods that he had bought in East Side pawnshops.

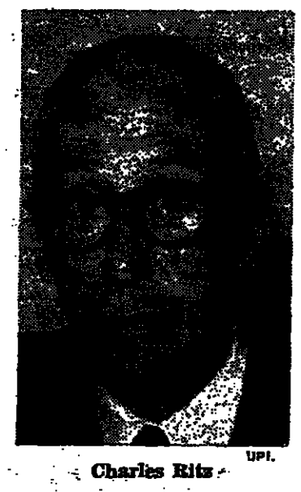

This launched Mr. Ritz on a subsidiary career as a designer of rods. Even in his seventies, he remained on the payroll of a large French sporting-goods concern as a consultant on fishing tackle.

When the United States entered World War I, Mr. Ritz joined the U.S. Army. He had already done military service in Switzerland, where he was born Aug. 1, 1891. His language proficiency—he was fluent in German, French, Italian and English—got him an assignment as an interviewer of foreign-born soldiers. He became a sergeant.

After the war, Mr. Ritz stayed in the United States. In 1928, he yielded to his mother's urging and returned to Paris.

Since Mr. Ritz found the hotel competently managed, he went to work in the Paris office of a New York stockbroker. Later he managed a shoe shop, whose back room became a clubhouse for fly casters from all over the world.

The hotel on the Place Vendome had been Mr. Ritz's main interest since, clinging to his mother's skirt at the top of the stairs, he had watched his father, César, greet guests at the gala opening in 1898. Charles Ritz became chairman of the board in 1923.

UPI.

Charles Ritz

It has been reported that when he took over as chairman of the board of Ritz Hotel Syndicate, Ltd., a company established by his father in London, Mr. Ritz owned only 1 per cent of the stock, the rest being held by investors.

**Gen. Pi Ting-Chun**

HONG KONG, July 14 (UPI). —Gen. Pi Ting-chun, 62, the second high-level Chinese military leader to die last week, was buried yesterday in Foochow.

Gen. Pi, 62, died July 7, less than 24 hours after the death of Chu Teh, 90, a former commander-in-chief of the Chinese People's Liberation Army and one of its founders.

A report on the funeral services by the official New China News Agency said Gen. Pi "died a martyr at his post." No other details of his death were disclosed.

# Tanzania, Zambia Get New Railroad

KAPIRI MPOSHI, Zambia, July 14 (Reuters).—Chinese Vice-Premier Sun Chien today formally handed over the 1,860-kilometer-long railroad his country built to the governments of Tanzania and Zambia.

Mr. Sun presented the line, China's biggest overseas aid project, to Zambian President Kenneth Kaunda and Tanzanian President Julius Nyerere at a ceremony here, the line's Zambian terminal, 200 kilometers north of Lusaka.

The railroad took six years to build and cost 389 million kwacha ($250 million).

# White Rhodesian, 8, Slain by Guerrillas

SALISBURY, Rhodesia, July 14 (AP).—A white girl, 8, was killed and five persons injured when three cars were ambushed by African nationalist guerrillas in southeastern Rhodesia last night, security force headquarters announced here today.

The guerrillas attacked cars traveling on roads in three incidents during the Rhodes and Founders holiday weekend. The death of the child brings to 33 the number of white civilians killed in almost four years of war between guerrillas and forces of the white minority government.

In the same period, at least 415 black civilians have also lost their lives.

# Catholic Is Killed In North Ireland

BELFAST, July 14 (UPI).—A 19-year-old Roman Catholic was found shot to death outside a Belfast bar early today, police said.

The victim, Gerard Gilmour, had also been beaten heavily about the head, police said.

Police also disclosed the death of a sixth Protestant victim of a machine-gun attack on the Catholic-owned Ramble Inn 12 days ago.

**H. Duncan Hall**

WASHINGTON, July 14 (WP). —H. Duncan Hall, 85, an author and historian of the British Commonwealth, died Thursday at his home in Bethesda, Md.

In 1925, he led the Australian delegation to the first conference of the Institute of Pacific Relations at Honolulu and also was Australian delegate to the conferences in 1927 and 1939.

In 1945, he became historical adviser to the British Embassy in Washington and was director of the British Official War Histories of North America.

His last book, "A History of the British Commonwealth of Nations," was published in 1971.

**James Stout**

HARRISBURG, Pa., July 14 (UPI).—James Stout, a jockey who entered thoroughbred racing's Hall of Fame with 2,057 career victories, has died of a heart attack, officials said yesterday. Mr. Stout died Monday.

Mr. Stout rose to prominence in 1935 with 111 victories. He won the 1939 Kentucky Derby aboard Johnstown.

# Pope Paul Urges Catholics Uphold Church Tradition

VATICAN CITY, July 14 (UPI). —Pope Paul VI warned Roman Catholics today against what he called the "foolhardiness" of revolutionaries trying to destroy all religious tradition.

"We are heirs, we are continuators of work done before us," the Pope told his weekly general audience.

"We must beware of the foolhardiness of the revolutionary spirit characterizing so many people of our times, who ignore or want to ignore all the work done by past generations and think they can start the work of salvation of mankind by repudiating whatever experience, supported by a consistent and authentic teaching authority, has preserved for us, and starting again from scratch the task o building a new civilization."

Pope Paul did not mention the attacks of Catholic dissidents on his reaffirmation of priestly celibacy and his bans on birth control, abortion and divorce. He said, "We are wisely conservatives and continuators and we must not fear that this double quality, if properly understood, may deprive our present work of its vivacity or geniality."

**Bus Plunge Kills 23**

KARACHI, Pakistan, July 14 (AP).—A bus plunged 200 feet off a highway last night, killing 23 passengers and injuring 24, officials reported today.

# Korean Air Lines. Starting 15 July 1976, you have to choose.

## Paris-Seoul: Two flights per week.

15 July 1976 Korean Air Lines inaugurates a third flight between Europe and Korea: Zurich-Seoul, every Thursday by DC 10.

Zurich and Switzerland have hidden charms. Plus the fact that perhaps it's closer to where you leave from. In Zurich you're in Seoul. In Seoul you're in Tokyo, Osaka, Fukuoka, Hongkong. Thanks to Korean Air Lines you're everywhere in the Far East.

Everyplace where business is, it is done with you, or without you. You're in Pusan, Cheju, Taipei, Manila. Names dreams are made of, even a businessman's.

What's more, Korean Air Lines has chosen the southerly route by way of Bahrein.

A first step and you're in the Middle East. A second step and you're in the Far East.

N.B. If the next time you leave for Seoul on Tuesday or Saturday, go by way of Paris. It's great. Too.

## Zurich-Seoul: One flight per week.

# The Reconstructed Democrats

The Texas delegation was on its feet, cheering wildly, and so was just about everyone else at the Democratic National Convention. The Lone Star flag was being brandished with almost aggressive enthusiasm, and there on the platform stood two Texans taking the cheers: party chairman Robert Strauss, the son of a Jewish small businessman, and Rep. Barbara Jordan, the daughter of a black preacher.

If the women's movement had not made it something of an offense to repeat, we know just what we would say to the Democrats: You've come a long way baby.

Miss Jordan, the powerhouse representative from Houston, was, of course, the principal object of the cheering, and Miss Jordan—perhaps above all others in the hall—had a fit sense of the meaning of the moment, of its historical importance. She had already cast her audience back 144 years to the origins of the party and taken note of where they had finally come and what was distinctive about the occasion. "There is something different and special about this opening night," she said simply—"I am a keynote speaker."

* * *

We will take a shorter historical view than Miss Jordan's in recording our wonder and admiration at how the party has reconstructed itself, broken its sour precedent and tradition, opened up its processes and emerged as an utterly different collectivity from that which assembled in Atlantic City just 12 years ago this summer. Would you believe an all-white Mississippi delegation? Would you believe state party rules and regulations countenanced both by law and by the national party apparatus, which made such delegations inevitable and which had been subject in the past to no particular reproach from the party—only to a large cynical wink? That was Atlantic City. But Atlantic City was also the beginning of the end.

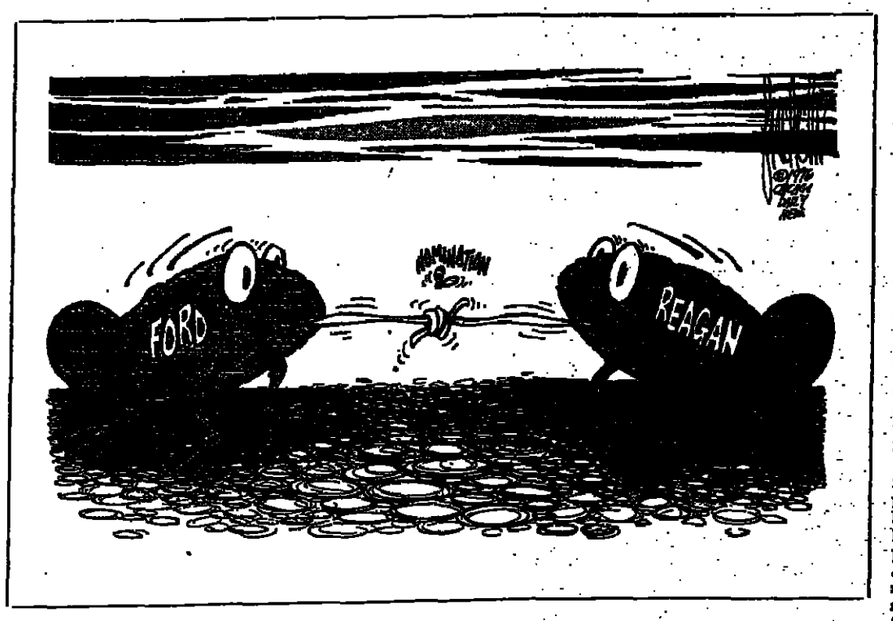

We do not mean to minimize the role played in the transformation of the Democratic party by forces and pressures and —*yes—acts of heroism* that were part of a larger social movement outside the party. But the train of events set in motion 12 years ago was crucial, and recollecting it may also shed some useful light on the disputes over representation—mainly women's —going on in the party now. You may take it as the nearest thing we have to an immutable law in politics that when the Democrats have done *something novel and* beneficial—even near revolutionary—you will generally be prevented from noticing that fact by the hollerings of discontent that will at once go up—the unequivocal assertions that far from doing a social good or enacting a genuine reform, the party has either (a) not gone nearly far enough or (b) merely "sold out" to the forces of reaction.

That was the ambience of Atlantic City, and it was the note on which that convention closed for many of the party's *civil rights* activists. And yet, in contriving a call to the next convention that required nondiscriminatory delegate selection and which set up procedures to help state parties comply in good faith, the Democrats did in effect mandate a revolution.

Needless to say, what was committed to paper was not necessarily a commitment so far as the party's entrenched (and complacent) powers were concerned, and there was plenty of legal and political struggling in the ensuing four years—and after—to make that party pledge a reality. Again, it took time: At Chicago in 1968 and at Miami in 1972 and in the deliberations that went on between conventions, much effort was required to get the procedures working fairly and right. Others besides blacks had legitimate claims to be met; the mechanisms for opening the party up and ensuring fairer representation had simultaneously to avoid the rigidity and basically anti-democratic thrust of preordained quota systems; and so a great deal of conflict and confusion and changing of direction has necessarily attended the whole enterprise. And so too—witness the continuing turmoil over what is just in relation to women's representation—some of the conflict continues.

Our point is simply this: No one looking around that hall on Monday evening, no one listening to Miss Jordan make her speech and no one observing the absolute transfiguration of the Democratic party—in particular of its Southern delegations—could fail to be impressed with the achievement. Most notably, it had not come down to kicking out one group or segment to make way for another. It had been a matter of making room—not just in the party itself for different groups, but also in the minds of the various delegates for new ideas and broader conceptions and better understandings of one another. Yes, the Democrats, like all the rest of us, still have a long way to go, at least on the mutual understanding front. But watching them the other evening we got the idea that Miss Jordan's *conception of "community"* was alive and well in the Democratic party.

THE WASHINGTON POST.

# China Prepares for Mao's Death

By Victor Zorza

LONDON—The impending death of Mao Tse-tung is beginning to be discussed in the Peking press—not openly, of course, but between the lines. This, at least, is the impression conveyed by an article in Red Flag, the party's ideological journal, which called for a purge of "those in power within the party taking the capitalist road," and then added that the party had carried out such purges under Mao, and would go on doing so—presumably after Mao. "Over many years," it says, "under the correct leadership of Chairman Mao, our party has acted in this way, and will continue to act in this way."

There are always disagreements between analysts who are inclined to read too much between the lines of the Chinese press and those who don't read at all, but the twists and turns of the Peking power struggle have generally borne out the views of those who made the more far-fetched assumptions. With Mao removed from public view after a series of television appearances which showed his increasing frailty, and with the death at 90 of Marshal Chu Teh, who had since been substituting for Mao in receiving foreign dignitaries, it was only to be expected that the pace of the struggle for power would again quicken in Peking. But the glint of steel shows only very rarely, and so quickly that it is difficult to capture, in the mass of verbiage with which the struggle is overlaid in the Chinese press.

### Radicals in Control

For a long time Western analysts found it difficult to accept that the Chinese press was controlled in the main by the radicals, while the country's administration was controlled by the moderates, and that the radicals were challenging the moderates for the control of the country. But after the fall of Teng Hsiao-ping, China's top administrator, at the beginning of the year, it was at last accepted that the campaign waged between the lines of the press against certain allegorical figures had indeed been directed against Teng. Recent history is now repeating itself. There is reason to believe that the campaign now being waged in the press against "capitalist roaders" is aimed at the present Premier, Hua Kuo-feng—even though he acts at the same time as the country's top administrator, delivering authoritative speeches and conferring with foreign leaders.

But once again analysts are divided about the meaning of the signals in the Chinese press. The absence of any direct attacks on Hua—or, for that matter, on anyone else except Teng Hsiao-ping —has led some experts to conclude that the Peking factions, spurred by the expectation of Mao's death, have come to some sort of accommodation. But there is also evidence to the contrary. The repeated warnings against the emergence of revisionism in the Central Committee, against the degeneration of "leading cadres," against the treasonable leanings of "high officials," provide a number of clues that Hua is one of them.

### At the Top

For one thing, there is a consistent effort to make it appear that these officials are still to be found at the very top of the party hierarchy. For another, some of the charges made against them seem to be aimed specifically at Hua. The latest press campaign, for instance, is directed against those who want a "rectification" campaign, that is, a purge of party members. It so happens that in a speech that Hua made last October he called for just such a "rectification," making it clear that what he really wanted was a purge of the more radical elements.

Another press campaign condemns "high officials" who oppose the use of the urban militia for public security duties. The radicals have been trying for some time to fashion the urban militia into their private army. It so happens that Hua, who was the minister of public security before he became Premier, and who still retains control of the ministry, fought hard to prevent the radical and the militia from taking over the security duties performed by his men. It was Hua's control of the Ministry of Public Security which provided the power base that enabled him to rise to Premier.

It may be that the campaign against Hua is the radicals' response to his own attempts to restrict their power. If a purge of the more radical elements, perhaps no longer protected by an enfeebled Mao, was being planned by some of their opponents, the radicals would have good reason to denounce the "high officials" who might be behind it—and to say that it is they who should be purged. If the arms are being held back from the radical-controlled militia—as they evidently are—the radicals would again have reason for counterattacking "those in power taking the capitalist road." Both factions are jockeying for the best position at the moment of Mao's death, and their maneuvering on such issues as the militia and the purge is designed by them to grasp more power for a possible showdown.

The policy issues in the struggle between the radicals and the moderates are real enough, but they have been overlaid for the time being by the struggle for brute power. In order to carry out the policies they favor, they have to secure the succession first. There is no lack of material in the Chinese press to show that the policy issues are much the same as they have been for some time. The radicals spout the utopian ideals of equality, while the moderates argue, with recent experience from the Cultural Revolution to back them, that this would lead to sheer anarchy. The radicals want to follow an isolationist policy, while the moderates would open the door to the world—or at least a window.

But there is a third power center, the military. They are in the best position to form a transitional regime when Mao goes—unless their own deep divisions cause them to take sides in a political struggle that could lead to civil war.

## *Of Why This Man*

# Jimmy Carter: A Fable

By James Reston

NEW YORK—Once upon a time—this was away back at the start of the third century of the Republic—there was a peanut farmer in the state of Georgia (U.S.A., not U.S.S.R.) named Jimmy Carter, who thought he could be the leader of the most powerful country in the world. He lived in a strange land, where children were taught that the people ruled, and any one of them might dream of leading the nation out of the wilderness.

It was a very unusual wilderness. Unlike most other lands, its people were very rich, but weren't having a very good time. When life was hard, as it was on the peanut farms of Georgia when Jimmy Carter was a boy, they struggled along: They dealt with adversity, but prosperity baffled them. The very rich had more prosperity than they could handle, and the very poor had more adversity than they could bear. "Lead us not into temptation," Carter remembered, and set out to reduce the temptation and take over the kingdom.

Now, it happened at that time that the people were sorely divided. All the noble principles of the Republic had been violated. The nations of the old Western civilization were in trouble. They were wracked by unemployment and inflation, and challenged by the new nations of the south, the rising imperialism of the East, and the commercial competition of the new scientific nations of Europe and Japan.

But when Carter came forward, vowing to correct these divisions and corruptions, the presiding rulers of the nation and even the elders of his own party laughed in scorn and asked: Who is this man who presumes to redeem the folly of the world?

He astonished them by his answer: I think we can do it—do anything if united. I am an average person, he said, no more complex or enigmatic than other people. But even when he had won the confidence of the multitude, and taken over the leadership of his party, he was proclaimed in public but reviled in private by many of the liberal scribes and Pharisees.

This, of course, was an age of skepticism, and idol-smashing. So many promises had been forsaken, so many ideals disappointed, so many heroes rebuked and scoundrels exposed, that even the new presumptive leader was greeted at the moment of his triumph with cries of doubt.

He was excessively "ambitious," complained the Wall Street Journal, "the hungriest politician of our time." He had an "awesome appetite" for the presidency and was willing "to go to almost any lengths to satisfy it."

He was charged with taking over a "reluctant party" through an "indomitable will." Also, with being "determined, disciplined, self-confident, combative, humorless, and vindictive." Even with being a little like Richard Nixon, a disgraced former leader of the past, "a single-minded loner surrounded by a cadre of loyalists who have no ideology and no commitment to anything but their leader."

He didn't protest, even about the outrageous analogy with Nixon. "Forgive them for they know not what they do." He confessed to being ambitious, determined, disciplined, combative, shrewd, but not to being humorless, vindictive, or remote.

He just kept going. Were the scribes still worried? He met them on "Meet the Press", an amiable inquisition of those days, and tried to reconcile all his irreconcilable statements of the past. Were they worried about his wife? She talked to Walter Cronkite on television about the struggles and mysteries of life, as if he were her old friend and trusted next-door neighbor.

It was one of the mysteries of those days that in a country founded on religious belief, born-again atheists and agnostics—"Ye men of little faith"—did not have to explain their doubts, but believers had to stand and deliver public witness to their convictions.

And yet, the people rallied to this stranger and prevailed over the elders of the party and the doubting scribes. They had a new candidate with a very old message. He was saying: Look homeward, look to the center, let's make a new start with a new generation of leaders.

He was, of course, cribbing from Lincoln: "All the armies of Europe, Asia, and Africa combined, with all the treasure of the earth in their military chest, with a Bonaparte for a commander, could not by force take a drink from the Ohio or make a track on the Blue Ridge in a trial of a thousand years.

"At what point then is the approach of danger to be expected? I answer, if it ever reach us it must spring up amongst us; it cannot come from abroad. If destruction be our lot, we must be its author and finisher. As a nation of freemen, we must live through all time or die by suicide."

So it came to pass that Jimmy Carter was nominated and everybody said it was a dull convention: No competition, no serious arguments, a dreary dozer. Okay, said Jimmy, just right. Our last two conventions were exciting disasters.

But who is Jimmy? asked the doubters in the end. What does he really belive in? Why does he appeal to so many conservatives and liberals, so many Democrats and Republicans, but leave so many people in doubt?

I don't know, he replies, but we need a change in Washington, and compared to Ford and Reagan, why not Jimmy Carter?

Moral of the fable: Never underestimate the possibilities of a peanut.

# United Vietnam

Vietnam is united after 22 years; the old Vietminh movement rules an undivided country from its capital of Hanoi. The flag and anthem of North Vietnam are now seen and heard officially from Cao Lang in the north to Cau Mau in the south.

The formal proclamation of reunification on July 2 created barely a ripple in faraway foreign capitals that once had assigned strategic significance to every square kilometer of Vietnamese landscape. The all-consuming passion of a whole political generation, Vietnam has all but disappeared from the U.S. consciousness, except in bitter memory that few in or out of public life want to revive.

The ultimate collapse of the U.S. war effort on April 30 last year has had none of the dire consequences that the war's supporters had predicted; if anything, the effect on American life and this country's global position has been beneficial—lifting an impossible burden that drained, not enhanced, U.S. security. In Vietnam itself, there has been no bloodbath—though the continuing detention of formerly influential South Vietnamese in "reeducation camps" smells more and more of long-term repression.

Vietnam and the United States would both benefit from an early establishment of diplomatic relations, though the heat of an election campaign may not be the ideal moment to raise any sensitive issue that can be put off.

Ever maneuvering among eager foreign influences, including the rival Communist superpowers, the Vietnamese leaders remain hopeful of United States investment and development assistance—lest they grow too dependent on the largesse flowing in from the Soviet Union. Establishment of official relations might even make it easier to obtain whatever information may still be available about missing U.S. servicemen.

In any event, there is no longer any need for perpetuating the estrangement of the United States from a non-aligned national Communist force of great potential influence in Southeast Asia.

THE NEW YORK TIMES.

# Oil Producers Hold the Trumps

By Clyde H. Farnsworth

PARIS.—The figures were buried in a recent speech of Secretary of State Henry A. Kissinger, but they point up a shift in thinking that has already had significant implications in the current bargaining to strengthen global economic cooperation. The figures show that for the next 10 years at least the industrial democracies will not reduce their dependence on imported petroleum.

Despite efforts to conserve oil and develop alternative energy sources, Mr. Kissinger noted, Western imports of oil from the Organization of Petroleum Exporting Countries will increase from 27 million barrels daily to as much as 37 million a day by 1985.

In other words, so long as the OPEC members maintain their alliance with non-oil-producing countries of the Third World, they will probably be able to extract concessions from the West in the negotiations over new international economic structures.

This represents a U.S. policy shift. After months in which its policy in the North-South dialogue seemed to be based on prospects for reducing OPEC's influence, the United States now and is playing the game more recognizes the cartel's trump cards realistically.

The first phase of the Conference on International Economic Cooperation, the formal name for the dialogue between rich and poor countries, has been concluded in Paris after six months of mainly analytical work in four commissions: energy, raw materials, development and finance.

A meeting of senior officials from the 27 conference participants ended over the weekend, reaffirming, in the words of a communiqué, the "political will" of governments to insure that the dialogue succeeds.

"We look to the commissions to produce concrete and equitable results in a number of areas reflecting the concerns of all participants," said the leader of the U.S. delegation, Under Secretary of State William D. Rogers.

### Left Unsaid

Left unsaid, but very much part of the background of the conference, was that all Western nations are increasing their dependence on imported oil as they move into an expansionary phase of their economic cycles.

A brief but nevertheless strategically significant reminder of the forces at work came from OPEC's Vienna headquarters last week when Secretary-General M. O. Feyide warned that oil prices could go up again, even before the end of the year.

In Bali, Indonesia, last May, OPEC oil ministers, in what they termed a gesture to the industrial democracies to improve the climate for the dialogue, held prices steady instead of raising them another notch.

The next price meeting, they said, would not be held until the end of the year. Now the signals have been subtly changed, a development that more or less coincided with expressions of "disappointment" by Third World countries at the lack of concrete results in the first phase of the Paris conference.

It was a "creative disappointment," said the Venezuelan Foreign Trade Minister, Manuel Peres Guerrero, co-chairman of the Paris conference. "We wanted to bring about a situation that would permit results to be achieved."

The UN Conference on Trade and Development pointed out two broad sectors in Nairobi, Kenya, last May where developing countries want action by the industrial democracies: debt management, which has become an ever more serious problem for Third World countries, and raw material prices, which the Third World wants stabilised at high levels.

Sweden and the Netherlands lead mavericks in the Western camp who are willing to wipe out the official (government-to-government) debt of developing countries, treating it, in effect, as a fresh foreign aid grant.

The United States, West Germany and Britain object, and are still evolving policies to deal with the question.

West Germany and the United States still lean toward reliance on market forces, with a system of international guarantees to keep earnings from falling below certain minimum levels, as the best way to deal with the raw material question.

France, on the other hand, agrees more with the Third World demand for a common fund that would be operated as a price-support mechanism, more or less as commodity price-propping machinery works in domestic farm programs.

The four commissions of the Paris conference are to hold weeklong meetings this month, in September, October and November, and with the whole thing expected to be wound up next December with a ministerial session in Paris.

On the basis of work in the commissions, the ministers would make recommendations for economic changes that would be directed to appropriate, existing international institutions.

But the procedures for translating the Paris conclusions into action have yet to be fully worked out by the participating governments.

In light of the new U.S. realism on oil dependence, the United States has let it be known that, even after next December, it wants the energy dialogue to continue.

### Cooperation Urged

"In energy there is a clear need for greater cooperation," Mr. Rogers said last week.

"We must develop adequate international mechanisms to assure that each of us has a clear perception of the energy strategies of others."

Energy, and specifically the crisis that developed after oil states quadrupled prices two and a half years ago, was the driving force behind the dialogue. The Western states sought stability of prices and supplies, and the oil states wanted Western help in industrializing, placing investments and stopping the erosion of their petrodollars by inflation.

The United States initially wanted to deal only with OPEC countries, but they joined a common front with other Third World countries, which the West has so far been unable to break.

So far, then, the grand Western strategy still appears to be based on the achievement of energy security.

## *International Opinion*

### *British Views on Uganda*

It is now obvious that Gen. Amin must know exactly how Mrs. Bloch died. And when. And who killed her. This evil act against a frail old woman demands the strongest possible response. Gen. Amin's greatest weakness is his growing isolation in Africa and the world. Britain should do everything it can to accelerate that process. It will eventually lead to Gen Amin's downfall at the hands of his own people.

*—From the Daily Mirror (London).*

* * *

As the sickening horror of what has happened in Amin's Uganda sinks in, the hardest thing for ordinary people to take is the half-mute, inglorious impotence of the British government. The thugs who murdered a helpless old woman—supposedly protected by British citizenship—will never be brought to justice as the mealy-mouthed Foreign Office . . . asks. In Parliament and in the United Nations the government must end the attempt to earn the goodwill of tyrants by moral appeasement, by wording trimming resolutions designed to mollify criminals at the expense of their victims. What has happened and is happening in Uganda is evil. Let us at least have the guts to say so.

*—From the Sun (London).*

* * *

Obviously it is right that the government should exercise proper concern for British citizens abroad, wherever they are, and take such steps as lie within its power to protect them if necessary. But . . . by constantly using them as an excuse for not saying or doing anything that might in the slightest degree be thought to annoy Gen. Amin, the government is doing two things, both undesirable. In the first place, it is calling attention to their vulnerability, and perhaps putting thoughts into the heads of Amin and his henchmen which might otherwise not be there. In the second place, it is depriving itself of the opportunity to condemn Amin's actions in the forthright terms which many in Africa and elsewhere would surely expect of any British government.

*—From the Daily Telegraph (London).*

## Letters

### Women's Future Role

This is in regard to the article (IHT, June 30) you carried entitled "Third World Women Lose Out in Modernization Plans," in which I was quoted as saying that at a recent ILO conference no mention was made of the sexual division of labor. The conference I had in mind was a World Symposium on "The Social Implications of a New International Economic Order" conducted January 19-23, under the auspices of the ILO-created International Institute for Labor Studies. At this meeting the sexual division of labor and the role of women in the new order were not debated when the implications for general employment were discussed.

Had the Wellesley Conference, June 2-6, occured *after* the ILO's more recent World Employment Conference my remarks would have been quite different though by no means complacent. The WEC made a strong opening statement on women's role in a basic needs strategy of development, and made special mention of women in its conclusions on social policies, population policy and education. It recommended that special emphasis be placed in developing countries on promoting the status, education, development and employment of women and on integrating women into the economic and civic life of the country.

However, speaking for myself, I remain apprehensive about future trends in women's status and economic sovereignty so long as women's interests are subsumed under social and legislative policies (which help them to "integrate" into a predetermined employment strategy) instead of placed equally alongside men's interests in the *design* of higher productivity employment. How technology is transferred, adapted and diffused will determine how much women gain or lose.

INGRID PALMER,
International Labor Office.
Geneva.

### Munich Massacre

Reuters' Scott Thornton's "A Question of Taste and the Munich Massacre" (IHT, July 7) quotes without comment producer Frank Von Zerneck as saying, "No attempt has been made to pin the blame for the massacre on anyone, whether the West German authorities or the Israeli government . . ." The blame for the massacre lay solely with the terrorists and if this point escaped Mr. Thornton and Mr. Von Zerneck, as it appears to have done, then neither of these gentlemen has any right making his living through the mass media.

J. M. S.
Paris.

## In the International Edition

### Seventy-Five Years Ago

July 15, 1901

NEW YORK.—The recent report of the Washington Bureau of Statistics reveals a state of things that has no parallel in any country, and is a record even for the United States. The excess of the exports over imports, the crucial test for the prosperity of any country, amounted in the past year to the enormous sum of $654,900,000, or $110,135,000 more than in the previous year.

### Fifty Years Ago

July 15, 1926

NEW YORK.—President Calvin Coolidge declined to make a statement today when questioned concerning recent stories that he would or would not be again a candidate for the presidency. Mr. Coolidge said he considered it "far too early" for him to make a statement to the nation regarding his plans. Meanwhile N.Y. Governor Al Smith has strong support for the Democratic nomination in 1928.

Time to beat

Racer's time so far

# During the Montreal Olympics, more than one billion people all over the world will be hanging on every quartz-measured second of Omega time.

Omega didn't invent the Olympic Games.

But they invented the heart-stopping, hair-splitting digital displays that put millions of television spectators all over the world right there in the Olympic judge's seat.

And they introduced the quartz technology (at Helsinki, 1952) that has taken Olympic timing up to a tingling thousandth of a second. (One hundred thousandth of a second if a judge should absolutely insist upon it.)

Omega. Already chosen seven times to time Olympic Summer Games. Already chosen six times to time Winter Games. Chosen – yet again – to time the Games at Montreal. A record no one can beat this century!

Award yourself Omega accuracy in this exciting Olympic year. One of the electronic quartz watches shown here, perhaps. The Omega Digital, summoning up digital display on demand. Or the Megaquartz 32, in a traditional and elegant style.

See them at your local Omega specialist. Watches you are right to trust. More than any other.

*Omega: Digital. Totally electronic quartz watch. LED digital display, five functions. Frequency: 32 768 Hz. Accuracy: 5 seconds a month. (Registered model.)*

*Omega Megaquartz 32. Electronic quartz watch. Frequency: 32 768 Hz. Accuracy: 5 seconds a month. Exclusive device for instantly modifying the hour when changing time zones. (Registered model.)*

# The European Attack on Dangerous Food Colorings

By Betty Freudenheim

PARIS (IHT).—If the prepared foods which you buy begin to appear a little less red or yellow, you can blame the new regulations laid down by the European Common Market Commission. You would be better off thanking them.

After January, 1977, the manufacture of 10 food coloring chemicals that have proven dangerous for consumption will be prohibited in the nine EEC countries. However, the manufacturers have the right to sell their remaining stock until Jan. 1, 1978. This means that for the next 18 months some may still be in the food you buy in the market.

All additives produced for the Common Market have code numbers beginning with the letter E. The numbers are usually printed on labels in the finest type available, in the most obscure corner of the package. Nine of the newly banned numbers are:

E 103, E 105, yellows
E 111, orange
E 121, E 125, E 126, reds
E 130, blue
E 153, black
E 121, brown, used only on the crusts of cheese.

The numbers do not correspond to their American counterparts.

In France, the ban required a vote of the Academy of Medicine and still awaits the signatures of the ministers of agriculture, health, industry and consumer affairs. François Custot, member of the French National Committee for Consumption and director of the Cooperative Laboratory, said, "This is the first time that the benefit of the doubt was directed in favor of the consumer. Generally it is the producers who profit."

The 10th dye, Amarante or E 123, is the infamous Red No. 2 whose ban in the U.S. was challenged by U.S. manufacturers in the courts. The Supreme Court has just upheld the Food and Drug Administration's decision not to permit this dye (IHT, July 8) which is used for a range of products from fizzy red drinks and ice creams to lipsticks and pill coatings. Laboratory tests in the United States showed that rats fed large doses had significantly more cancerous tumors. The Soviet Union prohibited this dye in 1960.

### Controversy

When the question of E 123 came up in the EEC, a controversy also arose. The decision was that its use should be continued until the end of 1978 since it was felt that "the tests which motivated the ban in the United States did not sufficiently prove that a small daily dose would be harmful."

Hans Jahn, a German expert, challenged this decision with a series of questions about the continued use of Amarante. The EEC Scientific Committee answered that it was aware of the research done in the United States and the Soviet Union but did not feel that a daily dose of 0.75 milligram per kilogram of body weight would be harmful. No mention was made of how the consumer was supposed to know how many milligrams of the dye were in the food, cosmetics or medications he used. "The use of Amarante answers certain needs of the community... it is difficult to replace Amarante with other coloring dyes," the committee responded. The red agent used in the United States as a substitute has not yet been approved in EEC countries.

In France, the Academy of Medicine, which must approve food additives, was also divided on the issue.

Prof. René Truhaut, toxicologist, protested, "There are too many exaggerated phobias among certain consumers." A proposal to ban E 123 but to exempt red fruit in liquid, liqueurs, shrimp and caviar was voted down on the recommendation of Prof. Hughes Goumelle de Pontanel, chairman of the Nutrition Commission. The effective date of the ban for France was moved up to October 1, 1976. Only caviar escaped the ban since experts felt that no individual will consume excessive amounts of it.

With the removal of these 10 dyes, 28 still remain on the approved list for the Common Market (only 10 coloring agents are permitted in the United States).

On July 1 Denmark put into effect a strict law covering food coloring agents. The Coca-Cola Co. there at first refused to comply with the ruling that it must reduce the amount of E 150 from 4 grams to 3 grams a liter. E 150 is a caramel created by browning sugar through cooking. The industrial production of this caramel requires the use of a chemical. It is used for flavor as well as color in soft drinks. The Danish minister for the environment refused to back down even though it could have meant the loss of jobs for 400 workers if Coke closed down. He cited Dutch laboratory reports showing that heavy doses of this agent given to rats caused a high mortality rate and impaired red blood cell production. Coca-Cola reconsidered and will now comply (IHT, July 11).

In Paris, Jacques Develay, president of the French exporting division of Coca-Cola said, "A consumer psychosis is developing in Europe without any basis of certainty. This ruling was made only because the Danes like things which are brown-colored. Coke is only one of the beverages (10 per cent of soft drinks) consumed in Denmark. Danes eat many pastries containing caramel over which the government has no control."

Outside the EEC, in Norway, E 250, a nitrite and E 251 and E 252, nitrates, are outlawed. Many U.S. nutritionists have doubts about their safety. They are used as preservatives and as a red fixative for cold cuts and other meats.

The EEC determines the safety of additives by short-term studies on two kinds of animals, one preferably not a rodent. Two species are also studied through several generations. In the selection of species, an effort is made to choose those with a metabolism similar to humans.

Marie Claude Duchesne of the Fraud Department of the French Ministry of Agriculture says that her office studies the findings of the U.S. Food and Drug Administration and research in other countries. New additives are constantly being introduced. "In 1960 we had only about 10 additives here; today there are close to 250. If a new one is added to the approved list, another is removed. This way there won't be five or six which do the same thing."

The use of the additives is controlled: quantities over the recommended levels constitute fraud in France. Edouard Mathieu, head of the department of quality of the French Ministry of Agriculture, says money to enforce controls has become a priority budgetary issue. Of the 615 new employees in the Agriculture Ministry in 1976, 173 were put into control services.

### Uniform Labeling

The Common Market is also enforcing a code of uniformity in labeling. Food products must now list all ingredients, food-coloring agents and other additives.

When Britain, Denmark and Ireland entered the Common Market, one of the conditions for membership was compliance with the regulations about foodstuffs. American embassies maintain a service for U.S. companies which wish to sell in Europe. The service explains the labeling requirements and the regulations about additives.

Dr. Marion Apfelbaum, nutrition expert at Bichat hospital in Paris, says that "Americans are reasonable in respect to food additives. The French, however, have a myth that everything which is natural is good to eat... this is a nostalgia for the past. They are suspicious of food which is treated industrially." He believes that additives have their social and economic values, but that they must be used within the limits prescribed by law. In this category he places additives which lengthen the time food can remain on the store shelves or those which add nutritional value. However even these must be watched, for when Vitamin D was added to milk in England, many children became ill because they were sensitive to this ingredient. Dr. Apfelbaum feels strongly that "color additives serve no purpose at all except to make things look good. Color added to peas makes them look greener which creates a false image so that untreated peas look wrong."

Mr. Mathieu, the quality expert, disagrees. "Don't these consumers agree that life in black and white would be dull and that color, even at the table, is also a quality of life?"

Francis Lepâtre, president of the French food additive industry association, agrees. "Food coloring additives are useful and sometimes indispensable," he said (in a statement to the press July 12th). "They have always existed and play an integral part of human nourishment. The French food industry uses 100 tons of additives a year, which amounts to two grams annually a person."

### London Report

But according to a report published in the Sunday Times (London) "The average Briton eats 3.2 pounds (nearly 1,500 grams) of food additives a year, the equivalent of 12 aspirin-sized tablets a day."

Mr. Lepâtre also spoke out vehemently against the consumer groups which are organizing boycotts of foods containing additives that they consider dangerous. At one such demonstration, called "Operation E 123" where leaflets were being passed out, a supermarket called the police to stop the boycotters.

James Moriarty, a dean of the American School of Paris, has organized his own boycott. He feels that "it is irresponsible for food companies to use ingredients which are under suspicion, particularly in products consumed by children." He published in The Voice, a newsletter for parents, a list of the numbers of food additives considered dangerous by a French consumer magazine. He also wrote to the manufacturer of Mars candy bars saying that he will "no longer carry their products in the school store unless they remove the suspicious additives." The company replied that it has complied with the rulings of the EEC and has done nothing illegal.

Mr. Moriarty carries over his boycott to his own family shopping. "I always take the kids with me. It's like a game looking for all those tiny numbers on the packages and then comparing them with the list. They find them on items which I had assumed were acceptable."

The question remains whether the general public is ready to accept uncolored mint syrup, pale cold cuts and ripe but green oranges. However food manufacturers never mention that nature itself produces a whole spectrum of colors which have managed to whet man's appetite since time began.

# A Bookstore for Those Who Shun Public Libraries

By Naomi Barry

LONDON (IHT).—"There are a lot of people who wouldn't want to be seen dead in a public library but they would very much like to be seen alive in Heywood-Hill." The pronouncement came from John Saumarez-Smith, director of London's clubbiest book store.

The premises are a converted mansion and the name plate is so discreet you have to peer for it even when armed with the address. Nothing suggests trade. The browsers seem to know each other and even if they walk out with an armload there doesn't seem to have been any exchange of money. The bills go out every quarter to the firm's 2,000-odd clients.

"It would be fatal if we belonged to a publishing house or a chain," Mr. Saumarez-Smith said. "They might dictate our stocks. What we aim to do is sell books to people we like."

What gives Heywood-Hill its cachet is that its director, who graduated from Trinity College at Cambridge in 1965 with a degree in classics, is a voracious reader. ("Lonely occupation that it is.") So is his assistant, Elizabeth Archibald, another Cantabrigian who took her degree three years ago. As a result, authors have adopted Heywood-Hill as a friendly outpost. "They like to see their books here rather than in an alien environment," said Saumarez-Smith.

#### The Regulars

"Besides, they rely on us for help." Leon Edel, celebrated for his monumental work on Henry James, has Heywood-Hill ferreting out books on Bloomsbury, his forthcoming project. The store gathered research material for Roderick Cameron, who wrote "The Golden Riviera." John Osborne, Kingsley Amis, Hugh Johnson are among the regulars.

"We have a number of academics and university professors who live in the United States," said Mr. Saumarez-Smith, "because the books they need are cheaper in England."

Gore Vidal, a visiting regular, dropped by on a recent visit to town for a TV interview on "1876."

"You must have cribbed Edith Wharton like mad," Mr. Saumarez-Smith told him. "He intimated to me that most of the reviewers hadn't noticed."

Leslie Slote, a vice-president of RCA, darts in several times a week from his office across the street. The neighborhood is thick with customers who couldn't be more faithful if Heywood-Hill were their favorite pub.

"Mr. Slote is interested in the Middle East and in archaeology. We phone him up as soon as we have any book that really says something new."

Mr. Slote was staggered when he picked up what he thought was a hot item and was told by Mr. Saumarez-Smith, "That's not for you." He dutifully returned it to the shelf.

"When we order books, we already know which of our customers will want them," said Mr. Saumarez-Smith. "We really try to look after our people. Sometimes I wake up in the middle of the night because I have forgotten a book I feel I ought to have sent to somebody. Liz and I are enthusiastic about what we like."

#### Current Likes

Among the current likes at Heywood-Hill are Nicholas Mosley's "Julian Grenfell: His Life and the Times of His Death," J.A. Symon's "Quest for Corvo," anything new by Muriel Spark, Susanna Agnelli's "We Wore Sailor Suits."

The shop was started by a man named Heywood-Hill in 1936. Nancy Mitford ran it from 1942 to 1945. In the early '60s, H-H sold the store to one of his customers. The family feeling persisted. Six years later, another customer bought it, similarly prompted by the desire to protect it.

Mr. Saumarez-Smith has developed a children's department in the basement because he thinks that children are necessary to happiness and because he feels that a generation of readers better be nurtured for the future. The shop also has an interesting selection of old books. For the moment he has the only complete edition of the works of Max Beerbohm.

"Most Beerbohm collectors are interested in books, not fashions and trends," he says.

"Augustus Hare is somebody else we like," he said, speaking for himself and for Miss Archibald. "We have the author's own editions of his books on France with his drawings and watercolors. Secondhand books are still a very great bargain and make for a really interesting library. A rich man will show you his pictures and his furniture but a library is his private possession.

"This is a trade in which you always enjoy yourself. I want to stay in it until they cart me away in a box."

*(Heywood-Hill, 10 Curzon St., London, W 1.)*

## INTERNATIONAL EXECUTIVE OPPORTUNITIES

Major food processing factory in Kenya

**FINANCIAL AND ADMINISTRATIVE MANAGER**

This senior appointment in an international venture entails specific responsibilities in finance (cost analysis and budgetary control, financial projections and reports, book-keeping supervision, etc.), and administration (administrative organisation, internal control, shipments, etc.)

The financial and administrative manager will also deputise the General Manager as and when needed.

Applicants should be highly qualified in accounting and business administration and have thorough financial and managerial experience in plant of similar size (approx. $4 million sales p.a.).

Attractive salary commensurate with experience and qualifications. Fringe benefits.

Please apply, giving full details, quoting reference Kan. Pr. 28, to: Cipher A18-4900, Publicitas, CH-1211 Geneva 3.

**INTERNATIONAL PETROLEUM AUDITOR**

New Jersey, U.S.A. $25,000 - $30,000 + exp.

An international exploration and production corporation requires a person to coordinate and conduct Financial and Operational Appraisals and review contractual agreements.
The person will have extensive financial and operational audit experience which must include the Petroleum Exploration and Production industry with a strong bias towards joint-venture audit. 50% of the year will be spent travelling in Europe and South America.
An accounting degree or its equivalent is required together with outstanding personal and professional qualities.
Relocation expenses for a family will be met and the salary range is $25,000 - $30,000 plus generous expenses and the usual excellent U.S. company fringe benefits.

Full details to: R.T.B. Green, A.C.A. (Ref. IPA), West Danes & Co.
9/9A, New Bond Street, London, W.1Y. 9PE.
Tel.: 01-629 6797/01-491 7216.

**GENERAL ATTORNEY-EUROPEAN OPERATIONS**

Brussels Location

A major U.S. growth company offers a newly created position responsible for coordinating extensive legal services (excluding patent/trademark) within multiple European operations. This position will report to the Corporate Vice President and General Counsel.

The successful candidate will be educated within the European system, have at least 3 years of European private practice and be well experienced in American law and business methods. Fluency in English and French is required; German, Italian, or Spanish helpful.

Interested candidates should provide full curriculum vitae details to: Box D-5,395, Herald, Paris.

Well Established Canadian Investment Firm seeks

**DYNAMIC SECURITIES SALESMAN**

Experienced continental Europe. Fluent French, English. Based Brussels, frequent travel. We offer an attractive compensation package.

Please write to:
Box D-5,391, Herald Tribune, Paris.

*President*
FORTUNE 500 ELECTRONICS CORPORATION **EUROPE**

**For the highly successful sales/marketing executive who hadn't thought of another affiliation—until now.**

This position represents an exceptional opportunity for an executive whose proven leadership capabilities and desire for professional achievement match the aggressive expansion plans of this multinational Fortune 500 corporation.

The individual we seek will have strong European sales/marketing experience, a semiconductor or components background, and the diplomatic skills necessary for success in working with various European governments. Fluency in one or more foreign languages extremely helpful.

As President, you will work for an established leader in the field, supported by a progressive management with large-scale plans for a growing impact on the European market . . . and the financial resources to carry these plans forward.

You will have full responsibility for overall management of the operation, plus an opportunity to develop and implement corporate programs including market planning, forecasting, research and strategy that will lead us into new and expanded directions.

Corporate headquarters will be quick to recognize, and to reward, the same kind of innovative thinking and management abilities that have made the company an industry leader.

Please reply in utmost confidence, including salary history and requirements.

Box D-5,393, Herald, Paris.

*An equal opportunity employer, m/f*

**Group General Manager**

For an expanding Middle East Group operating in Africa with four manufacturing units and some trading activity. Other projects under consideration. Climate pleasant.
The chief executives of the individual units will report to the Group General Manager who will co-ordinate their efforts, improve efficiency and plan for further development and growth.
Very senior managerial experience prime requirement; any nationality, but fluency in English essential; age around 45. Initial contract for three years.
Net of tax salary U.S. $40,000 with furnished house, servants and car. One month's vacation every year with passages paid.

Full information on career and emoluments should be sent to: Box 31,662, I.H.T., 28 Gt. Queen Street, London, W.C.2.

**General Manager**

For a biscuit factory recently established in Africa with annual production capacity of 4,000 tonnes proposed to be increased to 10,000 tonnes.
The General Manager will be the chief executive of the factory. He should have a high level of managerial experience in production and marketing of biscuits. Age about 40.
Initial Contract for three years. Salary will be U.S. $20,000 net of tax with furnished house and car. Pleasant climate. Six weeks' vacation in every eighteen months of service. Passage will be paid.

Particulars of career and emoluments received should be sent to: Box 31,661, I.H.T., 28 Gt. Queen Street, London, W.C.2.

**SENIOR CONSULTANT OFFICE TECHNOLOGY**

The London based European Head Office of QUANTUM SCIENCE CORPORATION, a world renowned American market research organization providing strategic marketing and planning services to the computer services and business communities, offers an exciting opportunity for professionals having extensive knowledge in text preparation, dictation, copy/duplicating, facsimile and microfilm/microfische products and markets. Ideally, candidates will have a strong background in marketing and product planning with major companies in the office technology field. They will also have the ability to express themselves clearly both orally and in written form and will possess fluency in French, German or Scandinavian languages.
Salary is negotiable in the £10,000+ p.a. range plus profit sharing, company paid medical and life insurance plans.
Please write including C.V. to: Miss Evonne Dalton, Quantum Science Corporation, 30 Charles II Street, London SW1Y 4AE.

**GENERAL APPOINTMENTS**

**ADMINISTRATIVE ASSISTANT**

(25 years +)

International corporation desires for its executive management a highly qualified secretary as administrative assistant with English as first language and also with bilingual or trilingual abilities and free for frequent business trips and eventually longer stays in U.S.A., Switzerland and France. Will pay top salary for properly qualified candidate.

*Please reply with full details in strictest confidence to:*
Box D-5,394, Herald Tribune, Paris.

**EXECUTIVES AVAILABLE**

**PROJECT MANAGER OR SUPERINTENDENT**

32, married, 9 years' experience in Sanitary and Storm Sewer construction, desires to relocate outside U.S. with family; resumé on request.
D.W. Wick P.O. 2792, EUGENE, Oregon 97402. Tel.: 503.688.34.60.

**EXECUTIVES AVAILABLE**

**AMERICAN LAWYER**

Six years Middle East oil and gas experience; now located in London; previous in-depth experience in Admiralty, Insurance, Direct Placement Financing, Litigation, Corporate, Contract and general practice in the United States, seeks law firm or corporate law position in London or Continental Europe. 45 years of age.
Box 31,664, I.H.T., 28 Gt. Queen Street, London WC2.

**PRESIDENT**
**AMERICAN COLLEGE OF SWITZERLAND**

Residential, "internationalized" college of liberal arts and international business administration. Established 1963. Bachelor degree programs since 1969. Modern language institute. Forty countries represented in current student body of 200. Directed by trustees, ACS foundation-U.S.A. Incorporated in U.S.A. and Switzerland. Non-denominational, non-profit, tax exempt. Require doctorate. Experience in college teaching and administration; prefer French or German language capability. Position available immediately. Located in mountain resort village (Leysin) 5,000 feet above Rhône Valley and Lake Geneva.
Send inquiries: Charles B. Skinner, Secretary, Presidential Search Committee, Chalet Beau-Pays, 1854 Leysin, Switzerland.

# U.K. Trade Gap Swells In Wake of Pound's Fall

*From Wire Dispatches*

LONDON, July 14.—Britain announced a trade gap of million in June—£19 million than the previous month be worst deficit since last 's £383-million shortfall.

figures were published as overnment tried to persuade union leaders to back cuts e public spending program year, likely to total about lion.

before the bad trade news released, Chancellor of the Exchequer Denis Healey told the unions that in three or four years North Sea oil would bring massive aid to the British economy.

"If we keep our heads, we can achieve the same economic miracle in Britain as other countries have already achieved since the war," he said.

Ironically, spending on expensive oil production equipment swelled the import bill by £70 million, and made the deficit that much bigger.

Imports and exports in June were both records, at £2.4 billion and £2.04 billion, respectively.

"Invisible" earnings—from shipping, banking and insurance—showed a surplus of £130 million, so the current-account balance-of-payments deficit for June was £230 million.

The trend over the past three months points clearly to rising domestic demand as recovery from the recession gathers pace. Export volume has risen 4 per cent, while the volume of imports has gone up *much faster—by 9* per cent. Manufacturers have been buying raw materials from abroad to build up their stocks.

At least part of the deterioration in the trade account is due to the fall in sterling. Since March, when the pound's descent began in earnest, import prices have been rising nearly 2 3/4 per cent a month compared with an average rise of 1 1/2 per cent a month in the six months ended in February.

A Trade Department spokesman said the pound had fallen about 13 per cent in value since the end of February. However, it is believed that only about 5 percentage points of this decline has so far been reflected in the trade results. A lower value for sterling makes imports more expensive as well as encouraging importers to accelerate their purchases abroad.

Analysts say government is likely to have to revise upward its estimate for the current-account deficit for this year.

For the second quarter, the preliminary calculation of the seasonally-adjusted current-account deficit came to £674 million, a sharp widening from £80 million in the first quarter.

The current-account deficit is considered important because it has to be financed with either capital inflows or a drawdown of Britain's already meager monetary reserves, or both.

In mid-June, Harold Lever, a cabinet minister who is considered to be the government's top economic strategist, predicted that the current-account deficit for 1976 would be around £1 billion.

In telling trade union and Labor party leaders that tough new public spending cuts are needed, Mr. Healey said that "Either we risk being pushed by a collapse of foreign confidence into a massive deflation, or we move steadily back to full employment and get out of debt as our recovery gathers strength. If we choose the first course, the government will not survive," he said.

Mr. Healey did not spell out the actual amount of planned spending cuts.

Political sources said that Prime Minister James Callaghan warned that if Labor party lawmakers reject the spending cuts, he will be forced to dissolve Parliament and call an early general election.

Sterling lost about 60 points against the dollar on the foreign exchange market today, closing at $1.7818.

# OECD Fears Slowdown in Bonn

By Carl Gewirtz

PARIS, July 14 (IHT).—For almost a year, West German officials and the economists at the secretariat of the Organization for Economic Cooperation and Development have been locked in a quiet dispute about the outlook in Western Europe's most important economy.

The recovery in Germany, the most advanced of any European nation, is a key element in transmitting the forces for growth; demand there is supposed to fuel the revival of business in France and the Benelux states. And as activity in those states picks up, the effect will ripple out to other countries.

Many officials—in Washington and Bonn as well as at the Bank for International Settlements and the OECD—have warned recently of the dangers of setting off a new economic boom. But in the OECD's view, policy in Bonn, if anything, is erring on the side of overcaution.

To be sure, the OECD's record on calling the shots in Germany has been off target. Last year, for example, the OECD warned that policy measures in Germany were unlikely to produce anything more than a rather flaccid 3 1/2-per-cent increase in the nation's gross national product this year, while Bonn put the figure at between 4 and 5 per cent.

In fact, the GNP appears to be headed for a 5 1/2-per-cent increase this year.

The OECD, however, remains undaunted. In its annual report on Germany published today, the secretariat warns that "much of the buoyancy results from the change in the [inventory] cycle and powerful policy stimuli which will become weaker later in the year."

The view in Bonn is that enough momentum will have been created to "generate a self-sustained upswing." And while German officials acknowledge that the recovery has begun to slow, they claim that this is desirable (IHT, July 13) as it minimizes the risk of a new inflationary outburst.

Economists at the OECD, however, do not agree. The OECD report states that "available indicators are insufficiently forward-looking to enable a hard and fast judgment to be made at this stage. Much will depend on the development of exports and the future behavior of fixed investment after the gradual decline of fiscal stimuli, and whether these two demand components will be strong enough to produce a substantial rise in employment."

The secretariat says that, while a "risk of a relapse into recession seems rather remote at present, the possibility cannot be excluded" and urges Bonn "to have measures in reserve to meet this contingency."

The OECD, in fact, is not alone in this view. Kurt Richebacher, chief economist at Dresdner Bank, observes: "With an incredible self-assurance which they kept up throughout their enormous mis-prognoses in the recent past, [economic experts] declare the danger of a renewed slump following too-hasty braking measures to be absolutely nonexistent. Nevertheless this opinion exists, and I for one subscribe to it."

An element that these experts find worrisome is the Bundesbank's monetary policy. It has set an 8-per-cent target for the growth of the central bank money stock (the sum of currency in circulation and required reserves on domestic deposits) for this year, the same goal as last year. However, most of this increase has already occurred as the 1975 expansion exceeded the target by 5.4 per cent and, since then, the OECD notes, "the rate of increase has slowed markedly."

The OECD also sees a rather weak trend in fixed investments by industry. It estimates that business spending rose 5 per cent in the first six months of the year and will show no growth at all in the final six months.

"A recovery of the overall profit situation is a necessary though not sufficient condition" to get industry to spend more. "Growth prospects are also an essential element," the OECD stresses.

The OECD also estimates that the impulse from companies rebuilding their inventories has already run its course and it sees consumer demand as rising but unlikely to have much impact on production or employment.

On trade, the OECD estimates that German merchandise exports will rise 11 per cent this year while imports will increase around 11 1/2 per cent. Adding expected outflows from tourism and private transfers, the OECD expects a substantial decline in the current balance to a surplus of around 3 billion deutsche marks from 9.2 billion DM a year ago.

The OECD also sees "only a modest increase in employment" this year, leaving the number of workers looking for jobs "uncomfortably high." It notes that "the higher jobless rate among university graduates ... seems to point to a growing mismatch between supply and demand for academically trained people."

The OECD gives Bonn high marks on containing inflation. "The rise of consumer prices is still decelerating and is one of the lowest in the OECD area, and recent wage settlements should be conducive to continued deceleration of unit labor costs and prices."

# 3 Brokers Penalized on Potato Default

NEW YORK, July 14 (AP).—The New York Mercantile Exchange assessed a $2,265 million penalty yesterday against three brokerage firms in the wake of the largest default in commodities trading history.

The exchange said the penalty, amounting to $2,265 for each of 1,000 Maine potato futures contracts which defaulted May 25, will be assessed against Thomson & McKinnon Auchincloss Kohlmeyer of New York, Clayton Brokerage of St. Louis and Heinhold Commodities of Chicago.

The penalties, subject to review by the exchange's board of governors, will be assessed by the exchange clearing house. The exchange did not say how the total penalty would be broken down among the brokerages.

Commodities observers said they expected the three brokerages to attempt to recover the amount of the penalties from customers who held the contracts and did not deliver the potatoes as required.

Under exchange rules, only members of the exchange clearing house can be penalized.

Most of the 1,000 contracts in default had been sold by Jack Simplot, a major grower of potatoes in Idaho as well as a processor, and by Pete Taggares, another large farm operator in Washington.

Early in June an exchange committee set a price of $10.66 a hundred pounds as the fair market value of the potatoes in default, and the sellers were asked to put up the difference between that price and the closing price on the last day of trading of $8.70, or $1.96 for every 100 pounds.

The dramatic default and the stubborn insistence of the sellers that holders of long positions had forced prices too high have posed problems for the new Commodity Futures Trading Commission and the exchange, and has led to a number of lawsuits. The lawsuits so far are mainly in behalf of owners of potato contracts who insist that they lost money when the sellers defaulted and failed to buy back contracts to settle positions or to make actual delivery of potatoes.

## Italian Extension Of Import Scheme Seen Approved

BRUSSELS, July 14 (Reuters).—The Common Market Commission today approved in principle a three-month extension of Italy's import deposit scheme due to run out on Aug. 5, informed sources said.

The decision will be formally announced next week once the member states have endorsed the commission ruling, the sources said.

But there is likely to be no opposition from the other eight governments given that none of them voiced objections when a possible prolongation was raised at the EEC summit here yesterday by outgoing Italian Premier Aldo Moro, they added.

The import deposit scheme, introduced last May to defend the hard-pressed lira, needs special authorization from the commission because it breaks the EEC's fundamental principle of free trade among member states.

# Most NYSE Prices Up On Reduced Turnover

NEW YORK, July 14 (IHT).—Despite a softening in some of the blue chips, prices on the New York Stock Exchange pushed mostly higher today following a step up in the flow of bullish corporate earning statements for the second quorter.

The market opened on a weak note, but about an hour later began ahead after IBM reported a 27-per-cent gain in profits for the second quarter.

IBM added 7/8 to 278 1/2, while RCA, which also posted higher earnings, picked up 5/8 to 30.

North American Philips was up 1 3/4 to 30 1/2, Boise Cascade added 1 1/4 at 27 1/2, Colt rose 2 to 53 3/4 and Westinghouse added 1/8 at 16 7/8.

Heavily-traded Rucker Co. gained 1 1/2 to 23. The company said it had no explanation for the rise and said it expects to release second-quarter results in about a week.

The Dow Jones industrial average continued to stall in the 1000 to 1011 range as it did yesterday. The index was down 0.90 to 1005.16 after moving in a narrow range all day.

But advancing issues outnumbered decliners by about 855-to-545.

Volume totaled 23.84 million shares, compared with 27.44 million yesterday.

Analysts said the industrial average continued to struggle with a heavy supply of stock available in the area above 1,000, as it has since early in the year.

Brokers said the market was held back by the report that some analysts are having second thoughts about the June wholesale price figures, which showed a smaller advance than anticipated. Some analysts say that without a pronounced decline in volatile agriculture prices, the expected big gain might have materialized.

International Paper sagged 2 1/8 to 71 5/8. It plans to offer 2.25 million common shares early next month.

Buffalo Forge, which came in with lower earnings, fell 7/8 to 24.

**Amex Prices Mixed**

Prices on the American Stock Exchange were mixed on moderate volume. The index 0.11 to 107.05.

Nolex fell 1 1/2 to 7 1/. An economic evaluation study by the Stanford Research Institute indicated mixed results for Nolex's Flip-N-Sip carton.

Houston Oil eased 3/ 4 to 58, but Sambo's Restaurants rose 1/2 to 17 5/8.

In Chicago, soybeans, soybean oil, corn and oats futures climbed to allowable limits today.

The demand for farm commodity futures was strong on the opening after the Agriculture Department revised some figures on the wheat carryover and corn and soybean exports.

# Fiat Holdings By Agnellis Are Widened

TURIN, July 14 (AP-DJ).—The Agnelli family, acting through two of its holding companies, sold its majority holdings in a large insurance firm for 20 billion lire (about $24 million), then used the money to buy a large block of Fiat shares held by the insurance firm.

The complicated transaction was announced by Societa Assicuratrice Industriale (SAI), the insurance firm at the center of the operation.

SAI lost 30 billion lire last year after reporting a small 1974 profit of 62 million lire.

The buyer of SAI is Raffaele Ursini, head of the Liquigas group. He bought the 26.8 per cent of SAI shares held by Istituto Finanziario Industriale (IFI) and the 25.4 per cent held by IFIL Finanziaria di Participazioni SpA. IFIL, which owns 50 per cent of IFIL, is owned by the Agnelli family.

With the 20 billion lire generated by this sale, IFI and IFIL bought back the Fiat shares held by SAI. These constituted a 5.25-per-cent holding of the ordinary issue and 8.6 per cent of the preferred issue.

IFI had already held 25.7 per cent of the ordinary issue and 11.2 per cent of the preferred. Fiat holdings by IFIL are insignificant.

# *StockBuilding Gains in U.S., Sales Decline*

## Inventory Rise in May Biggest Since End-'74

WASHINGTON, July 14 (AP).—U.S. manufacturers marked up a big increase in the amount of raw materials and goods in stock during May, the government said today.

The increase in inventories—the biggest since December 1974—

• Corporate earnings reports will be found on page 12.

was seen as a hopeful sign for the economy, but was muted somewhat by the first drop in business sales in 14 months.

Business cut back sharply on inventories when sales slipped during the recession and has been cautious about rebuilding them since the recovery began. Economists have been counting on faster inventory growth eventually to create new jobs.

*The inventory increase in May* was $1.9 billion, or 0.7 per cent, compared to an increase of $1 billion in April, and brought the level of inventories to $272.5 billion.

Sales, however, were off 0.3 per cent following a 0.9 per cent climb in April. This was the first decline since the 2.6-per-cent slip in March 1975, and left sales at a level of $186.4 billion.

Generally, inventories are increased only when business feels that sales are growing fast enough to justify the decision. Steady sales gains since the recovery began apparently prompted the decision to pad inventories.

A key indicator of whether inventories are too big or too small is their relation to sales. And the amount of inventories on hand in relation to the current level of sales climbed slightly in May to $1.46 of inventories for every $1 of sales. That compared with a $1.45 ratio in April and marked the first increase since October, 1975.

Manufacturing inventories rose $1.05 billion to $149.17 billion following a decline of $39 million in April. Retail inventories increased only $58 million to $75.71 billion following a $563 million.

Manufacturers' sales rose $663 million to $94.51 billion. Retail sales fell $135 million to $52.56 billion.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

## Selected Over-the-Counter Stocks

NEW YORK (AP).—The following list is a selected National Securities Dealers Assn., over the counter bank, insurance & industrial stocks.

**TOTAL Compagnie Française de Raffinage**

**ORDINARY GENERAL MEETING OF JUNE 23, 1976**

The Ordinary General Meeting, held June 23, 1976, under the Chairmanship of Monsieur Paul CROSNIER, Chairman of the Board, approved the accounts for the 1975 fiscal year. All resolutions were adopted.

*The economic crisis as well as the strong recession in France in 1975 have deeply affected CFR's level of activity during this fiscal year.*

The tonnage processed by the Company in 1975 amounted to 27,496,000 tons of crude oil—a drop of *21.6% compared with the preceding year.*

Contrary to the situation in 1974 when the operating loss had been masked by a very high stock over-value, the results for 1975 are representative of CFR's operations, with stock over-value being negligible. *Gross results do not allow for coverage of depreciation and these have been limited to the amount of* the normal linear depreciation for the year: Fr. 371,600,000.

Under these conditions, the net result, after constitution of provisions, is a loss of Fr. 154,409,000.

Because of these bad results, the Assembly decided to forgo the dividend for 1975, in order to maintain reserve funds, should new unexpected contingencies arise in the French Petroleum industry.

Investments represent Fr. 463 million. This amount is not directly comparable to that of investments for the year 1974, which totalled Fr. 1,016 million but included two operations of an exceptional nature: the completion of the Raffinerie des Flandres and the take-over of a leading shareholding in Hutchinson-Mapa. However, after putting aside these two items, investments show a decline.

Nevertheless, the Board's statement warns that it would be a mistake to assume a decrease in future investment costs. The evolution of road networks and town planning as well as new safety regulations require important marketing investments. With regard to the refineries, fuel-savings and the protection of the environment should, of course, not be slowed down. Besides, the construction of important conversion plans must be planned without delay as they will be necessary to keep production adapted to the market.

Mr. René Perrin, Honorary Chairman, did not wish that his mandate as Director be renewed. The General *Meeting paid a tribute to Mr. Perrin for his outstanding contribution to the company development.*

*The General Meeting elected Mr. Jean-Louis BREUIL-JARRIGE to the Board of Directors.*

In his address, the Chairman insisted on the bad consequences for the company results due to official authoritative decreases in prices decided in April and June 1975, as well as the late and insufficient official *price increases in the second half of the year.* The company was not able to restore its profits when the dollar dropped and was penalized when this currency climbed again. This Government Policy and the low *state of the fuel market toward the end of the year are the main causes of the losses incurred during this* financial year.

The Chairman denounced the attacks, violent and unfair, launched against the Profession; he forcefully contended that thanks to the Petroleum companies, France never lacked Energy and that the companies have impoverished themselves while serving the Country.

In conclusion, the Chairman declared that measures for raising and freeing certain prices decided recently were too limited to allow the Company to recover economically; he expressed the wish that the Government acknowledge the intensity and the quality of efforts developed by the Petroleum Companies and draw conclusions on the legitimacy of their requests.

# BOOKS

## SPORTS IN AMERICA

*By James A. Michener. Random House. 466 pp. Illustrated. $12.50.*

Reviewed by Anatole Broyard

JAMES MICHENER has left no blade of grass unturned in his exhaustive and sometimes exhausting "Sports in America." He is a bit like the great Jim Brown the way he plunges ahead through dense masses of material. Somewhere in these pages, Mr. Michener says that, when he is about to begin a book, he gets into training much as an athlete would, and one can easily believe him. His energy in researching his subject is prodigious and it is only his monolithic clear-headedness and confident sense of purpose that keep "Sports in America" from degenerating into an anarchy of information or an embarrassment of riches.

Mr. Michener is too much his own man to be intimidated by all that he has turned up. After summarizing the main arguments of an apparently authoritative book on a given subject, he will then cite another book which refutes the first one, and after that he will give you his own opinion, which may or may not lean on either, neither or both of these works. The author was, and still is at 70, an enthusiastic athlete himself. Refusing to waste our time with false modesty, he lets us know that he still plays a mean game of doubles tennis. He feels that sports have not only changed his life but also saved it. His youthful energy, which must have been awesome, was diverted from possible delinquency into the codified ferocity of competitive sport. In his middle age, Mr. Michener survived a massive coronary infarction because he simply refused to "lose out" to it and because he had developed the physical equipment necessary to win the game of living.

"Sports in America" draws on every possible source: the author's personal participation in sports; his devoted following of many games he did not play; his intimate acquaintance with a number of world-famous athletes; his talks with athletes, coaches and sports commentators all over the country; his encyclopedic reading on the subject.

Here are some of his conclusions: While it is debatable that sports develop character, they may very well reveal it. The correlation some enthusiasts claim to see between success on the field and success in life simply is not confirmed by statistics. Under certain conditions, sports can be brutalizing or character-destroying. While Mr. Michener believes that there is too much emphasis on winning and too little pure joy of performance in much of our collegiate sports, he points out that winning teams fill stadiums and help to support schools. He is convinced, too, that competition is "a rule of nature" and that the tension it creates is part of "the structure of the universe." Competition against one's self is the solution he prefers in this controversial area. Of 60 athletes he has known, the author writes, 50 have been Republicans. When h attributes this partly to the fac that their coaches are usuall "simplistic, conservative and dic tatorial," it seems that he coul just as easily have assumed tha the athletes would rebel agains these values much as childre rebel against their parents. I would appear, also, that in thes days of charismatic athletes lik Joe Namath and O. J. Simpso and of other outstanding athlete who are militant blacks, M Michener's portrait may be a bi dated. And while he also en dorses the motion that athlete are too tired to think on thei own, he seems to overlook th fact that there is no shortage o tired thinking among radicals.

Feminists will field an angr team against Mr. Michener whe he asserts that boys between th ages of 12 and 22 should avoi athletic competition with girls be cause a defeat by them in thes sensitive years might be trau matic. One wonders whether i would not be better to get thi inevitable defeat out of the wa in the relatively harmless con text of sports than to defer it fo what may be a far more trau matic encounter when neither se is simply "playing."

Pointing out that the best kin of athlete is a "dancer," th author lists some of the funda mental rewards of sport: hilarity, revelation, beauty, power, grace, contact with nature, structured action or discipline and improved health. He deplores the fact that the two most popular sports in America, football and baseball —he might have included basketball and hockey—can be played only by the young. There's not enough emphasis, he feels, on the idea of continuity, on encouraging sports that can be played later in life and by less talented athletes.

Mr. Michener is no butterfly and he summarily dismisses the likes of Muhammad Ali and the art of fisticuffs. He gives no reason for this judgment and one cannot assume that the violence of boxing is its only disqualifying feature, because, as everyon knows, football may be even more destructive. It seems rathe arbitrary to eliminate the grace power and improved health o someone like Sugar Ray Robinson, who was, certainly, one of the greatest "dancers" of all times. It would have been most interesting, also, to discover what Mr. Michener thought about the "psychological" influence that pervades today's boxing picture. A determined body puncher like the author might easily have scored a technical kayo over much of the fanciful stuff that has been written about the heavyweight champion.

There is a great deal more in "Sports in America": discussion of the role of sports in the black ghetto; of the pros and cons of government control; of the public financing of private sports organizations; of the scandals of recruiting, of the insistence, in college sports, on a near-professional standard of performance; of children in sports.

For those of us who can no longer perform well in sports, whose "dancing" is all behind them, Mr. Michener shifts from pep talk to valedictory and reminds us that "most of life is a falling-away, a gradual surrender of the dream." In private life, we can all try out for the second team.

*Anatole Broyard is a book reviewer for The New York Times.*

# BRIDGE — By Alan Truscott

The diagramed example exposes the fallacy embraced by non-expert players who say: "I treat a seven or higher as a high signal, and anything less as a low signal."

The truth is, of course, that all signals are relative. The signaler's partner must study all the other cards with great care. On occasion, a fourspot may turn out to be high, or relatively high. In this case, a nine is, relatively, low.

The auction follows a normal course. North is right to raise spades rather than rebid a club suit that would look good to a poker player. South has enough to bid a game, although he is slightly nervous about his lack of aces and top trumps.

West leads his singleton club, and when East wins with the ace, South does his best by dropping the queen. However, it is not difficult for East to decide that his partner would not have chosen to lead dummy's suit from K-J-5, so he knows that his return will be ruffed.

East desperately wants a diamond return, to establish a trick in that suit while he still has the spade ace. To call for a low-ranking suit he must play a low card—but his lowest available card happens to be a nine.

All is well if West is paying attention. He has seen all the low spot cards up to the eight in dummy, so the nine must be an attempt to signal low. Therefore, West returns a diamond and the defense prevails. After any other return the declarer would eventually be able to throw a diamond loser on a club winner.

West led the club five.

# U.S. Walkout Possible as Taiwan Again Says No to Olympic Games

*From Wire Dispatches*

MONTREAL, July 14.—The ...pic emergency continued to-... when the United States ...pic Committee threatened a ...le walkout from the Mon... Games over the Taiwan dis...

...ording to an Associated ... report, the United States ... three days before the open... ... the Games here, forced the ...dy hassled International ...pic Committee executive ... into an emergency meeting ... morning.

...U.S. Olympic officials were meeting in secret to discuss the pullout move which was described as being a possibility but not a strong probability, the Associated Press learned. It also was learned that some U.S. Olympic officials were opposed to an American walkout, arguing it could signal the end of the Games.

Robert Kane, vice-president of the U.S. Olympic Committee, said, "It is not inconceivable that that [a U.S. withdrawal] could happen but we certainly don't want to pull out."

The pressure from the Americans came after the National Chinese Olympic Committee in Taipei officially announced that its team would not compete in the Games on the terms requested by the Canadian government and agreed to by the IOC. The terms were: not to compete under the name Republic of China, not to show its flag nor play its national anthem.

The 77-member IOC, after holding open the door for a compromise with the Taiwanese last night, had been due to begin the general session this morning. But that meeting was delayed as the executive board went into session. An IOC spokesman said they had no visitors with them.

The U.S. threat, also made earlier this week, and the announcement from Taipei came after a lengthy but "amiable" meeting last night of the full IOC congress, which unanimously agreed that the Games must take place on schedule.

Lord Killanin of Ireland, president of the IOC, said no vote was taken on the Taiwan issue "because none was necessary." He said the group's board of directors were unanimous in their approval of the executive committee's recommendations to accept terms for Taiwan participation laid down by the Canadian government.

Of the 78 IOC directors, 68 took part in last night's meeting at the Queen Elizabeth Hotel as the organization opened its 76th session. The session, which began with a traditional morning ceremony, lasts four days.

"We have proposed that the Taiwanese compete as individuals," said Lord Killanin. "We have asked them to march under the Olympic flag and play the Olympic anthem."

But in Taipei today, Niu Pingyih, secretary general of the National Olympic Committee, called the proposal made by Lord Killanin "an insult."

He said the new proposal was "a discrimination against ROC (Republic of China) which clearly violates the Olympic spirit."

"There is no way we would accept it. It is an insult, not a compromise," Niu said.

Niu said the IOC has completely given in to Canada's three demands.

"How could you call this one-sided capitulation a compromise?" he asked.

**Sensitive Issue**

WASHINGTON, July 14 (AP). —President Ford's press secretary indicated today Ford is particularly sensitive to the issue of Taiwan's participation in the Montreal Olympics because the 1980 Games are scheduled for Moscow.

Ron Nessen, who yesterday said on Ford's behalf that the Canadian government had no business imposing political conditions on participation in the Games, said today that the President regards the Taiwan issue as "a very important matter of principle, especially when you consider that the 1980 Games will be in Moscow."

At the moment, Nessen said, Ford "is weighing what response to make depending on the outcome of the next step."

The Press Secretary declined to say whether, under certain circumstances, Ford might urge the American team to boycott the Games, but noted that the president has no authority to enforce a boycott.

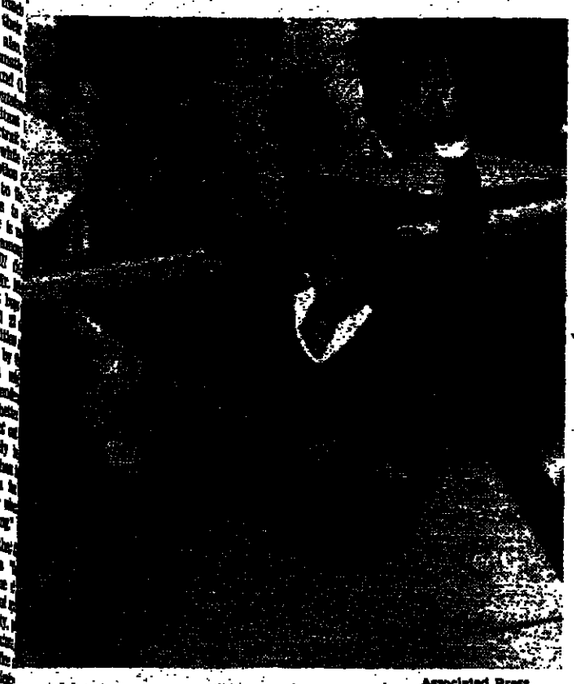

**Rumor of Trouble**

SACRAMENTO, Calif., July 14 (UPI).—The Sacramento Bee reported yesterday that American black athletes will be asked to withdraw from the Olympic Games by a group of African nations opposing participation by New Zealand.

Quoting an anonymous source, the Bee said the Supreme Council for Sports in Africa will approach American athletes "individually in an attempt to promote a pullout."

The Bee said American blacks will be asked to join African nations in protesting a tour by a New Zealand rugby team to South Africa.

President Ford tosses out the first ball at the All-Star Game while commissioner Bowie Kuhn watches. The President visited the players before the game and when he met Bobby Grich, the Baltimore Orioles' second baseman said he understood the President had been an athlete. "That was a long time ago," said Ford, "when the football was round. I read the sports page first. That way, I've got a 50-50 chance of being right. The front page, the odds are against me." Once the game started, the National League dominated. In photo on left, the Reds' Pete Rose slides safely into third as George Brett tries to make tag.

## Pace 5th Straight Victory

# Reds Make NL Too Strong for AL

By Joseph Durso

PHILADELPHIA, July 14 (NYT).—The National League, and most especially the Cincinnati Reds, treated President Ford and 63,974 other baseball fans to a convincing display of muscle last night by overpowering the American League, 7-1, and winning the All-Star Game for the fifth straight year.

Not even Mark Fidrych, the folk hero of the Detroit Tigers with the Harpo Marx hairdo, could calm the hottest bats in the business. In fact, the 21-year-old rookie who "talks" to the ball between pitches was jolted for two runs in the first inning as the Nationals extended their monopoly on the mid-season series—winning for the 13th time in the last 14 years and taking a series lead of 28-18 with one tie.

Whatever the game proved, the world champion Reds left little doubt that they were still the elite of the big leagues. Five of their players got enough votes in the public poll to win starting positions. They supplied seven of their league's 10 hits last night and George Foster was named the outstanding player in the game after he had batted in three runs inside three innings.

President Ford was so impressed that he stayed for the whole game and Fidrych was so impressed, though he stayed on the mound only two innings, that he later said:

"Wow, I can't believe I'm here. All my friends got to see me. It's neat being out there. Whoever thought I'd get to meet the President. No one should smile after a loss, but this is a different game. I'll be thinking about this all night."

Darrell Johnson of the Boston Red Sox, the manager of the American League team, has been thinking about Cincinnati power since the last World Series. But he preferred not to draw any rash conclusions from the Nationals' stampede in recent years, saying:

"It means that we've got to break the cycle. The National League has been winning for the last 10 to 13 years. Before that, the American won for 10 to 13 years. I don't know the answer."

**Unanswerable**

If there was an "answer," it wasn't evident on this breezy cool evening in the home of the Philadelphia Phillies before the largest crowd for an All-Star Game in 22 years and the third largest in all-star history. The National League infield turned three double plays, Foster and Cesar Cedeno of the Houston Astros contributed home runs and Fred Lynn of the Red Sox supplied the only "answer" with a home run for his league's score.

The Reds and their allies were so clinical that the pattern of the game was established during the first three innings, while the President was warming to a match between two young pitchers with rave notices—Fidrych and Randy Jones.

But before the two pitching prodigies got to work, it was President Ford who commanded most of the attention. He visited both locker rooms, shook hands with all 56 players, autographed many baseballs, bantered with "the Big Bird" Fidrych and marched out to home plate.

He threw out the "first ball" twice with a bit of presidential dexterity: right-handed to Johnny Bench, the National League catcher, and left-handed to Thurman Munson of the American League. Finally, he sat in a front-row box between commissioner Bowie Kuhn and Henry Aaron, whose 715th home run had just been lionized as "the most memorable moment" in baseball history, and watched while the Nationals tore into "the Big Bird."

On his second pitch in the bottom of the first, Pete Rose of the Reds drilled a single to center field. Then Steve Garvey of the Los Angeles Dodgers pushed a fading line drive to right field that dropped in front of Rusty Staub of the Detroit Tigers. The ball bounced high off the artificial turf past Staub, who fell, and Rose scored as Garvey checked into third base with a triple.

Staub then made a perfect throw to the plate after Joe Morgan's fly to medium right field, holding Garvey on third. But there was no holding the Reds. Foster followed with a grounder to second base that scored Garvey, and Fidrych ran from the mound a few moments later with a two-run deficit.

In the second inning, the Reds kept up their rain of hits against Fidrych, whom they had punished twice in spring training when the rookie was winning his job. Bench and Dave Concepcion singled, though nobody scored, before the 6-foot-3-inch right-hander was excused after two innings of four-hit pitching.

But in the third inning, with the smart old Catfish Hunter of the New York Yankees pitching, the Cincinnati attack grew even more dramatic. Morgan, who led all the players in the public poll that selected the top stars with more than three million votes, singled through the middle with one down. Then came Foster, his teammate, selected for the first time because of glittering statistics: 72 runs batted in, a .327 average and 17 home runs.

Foster whacked a solid drive to left-center that disappeared over the green fence between a marker that read "371 feet," and a huge white sign that said: "Happy birthday, America." And it was suddenly 4-0.

During those three innings of Cincinnati dazzle, the American League hitters were stopped rather cold by the "other" curly headed mound moppet, Jones of the San Diego Padres. He is a 26-year-old left-hander who supposedly has no fastball but who has 16 victories in half a season. He also has a degree in business administration, two springer spaniels and a wife who applies permanent waves to his hair.

**Seaver Repeat**

Jones allowed a leadoff single to Ron Leflore of the Detroit Tigers in the first inning and another to Staub in the second, then was replaced in the fourth by Tom Seaver of the New York Mets. It was the ninth time Seaver had been picked for the All-Star Game, but he was soon jolted slightly—as he had been in Milwaukee last year when Carl Yastrzemski reached him for a home run.

This time, it was Yastrzemski's Boston teammate, Fred Lynn, who outpolled everybody else in the American League in this year's public voting. Lynn pulled a high drive down the right-field line that slipped past the foul pole into the seats for a home run, shaving the lead to 4-1.

By the eighth inning it was still 4-1 after a parade of pitchers that included Luis Tiant and Frank Tanana for the American League and John Montefusco and Rick Rhoden for the National.

The Nationals padded their margin with three runs in the bottom of the eighth. They got the first one after Dave Cash of the Phillies led with a single, took second on a walk to Tony Perez of Cincinnati, took third during a double play and scored on a single by Ken Griffey of—you guessed it—the Reds.

To add insult to injury, Cedeno cleared the left-field fence for another pair, and the American Leaguers now were six runs short. When it finally ended, the Cincinnati Reds' supermen considered their own impact on interleague play.

"There were five of us in the lineup and we all got hits," Foster said. "The fans voted us all-stars and we wanted to show everybody we are all-stars. We're the world champions, and we have to keep proving it every time we go out on the field."

"If I was hitting .220," said Rose, who was hitting .335, "I'd feel funny being in the lineup. But look at the way our guys are hitting. We belong in the lineup."

# Cuba's Heavyweight May Have Tough Gold Medal Fight

By Dave Anderson

NEW YORK, July 14 (NYT).—Teofilo Stevenson, the Cuban heavyweight, towers over the fistic Olympic boxing tournament as the defending champion in his class. But many amateur boxing observers, notably Pat Nappi, a former United States coach, doubt Stevenson will be the champion in Montreal as he was in Munich.

"I don't think he'll win it," Nappi says. "He's lost that speed he had at that punch. He's rusty. Not enough work."

Stevenson is 25, which means he should be approaching his prime. But his decision to remain an amateur in Cuba rather than to turn professional may have limited his development. He is believed to have spurned at least two $1-million offers since 1972.

"What is a million dollars against eight million Cubans who love me?" the 6-foot-4-inch, 230-pounder said.

During the last two decades, four Americans have gone on to win the world heavyweight title after winning an Olympic gold medal—Muhammad Ali, George Foreman, Joe Frazier and Floyd Patterson.

But if John Tate of the United States succeeds Stevenson as the heavyweight gold medalist, it will be a surprise.

Victor Ivanov of the Soviet Union is a more serious threat to Stevenson's title. So are Andrej Betalski of Poland, Rajko Milic of Yugoslavia and Peter Husing of West Germany.

Another Soviet heavyweight, Igor Visotsky, recently knocked out Stevenson in the third round in Minsk after having earned a decision over the Cuban in Havana last year. But scar tissue over his eyes has made Visotsky a risk in the Olympics, where a champion must survive perhaps seven scheduled three-round bouts.

**Russian Left**

Rollie Schwartz, manager of the United States team, says: "Ivan is one of the few Soviets who knows how to throw a left hook. Most of them usually come straight at you, but Ivanov knows how to come at you at that good angle for throwing a left hook."

As for the 21-year-old Tate, a 6-foot-4-inch, 228-pound truck driver, he has the size, but not the big punch. His experience also is limited. But he has the reputation as a rough, brawling heavyweight, who might discourage opponents.

"He'll keep coming at you," Nappi says. "He'll take the heart away from some guys. He comes at you like Joe Frazier did, but he doesn't have the big punch that Joe did. But in training for three-round bouts, we stress a fast start and a fast finish in each round, and big John knows how to do that."

Stevenson has the opportunity to be only the fourth Olympic boxer to retain his title. The others were Laszlo Papp of Hungary, a light-middleweight in 1952 and 1956, Jerzy Kulej of Poland, a light-welterweight in 1964 and 1968, and Harry Mallin of Britain, a middleweight in 1920 and 1924.

Of the other Americans, the best prospect for a gold medal and a future as a pro is Sugar Ray Leonard. He'll be competing in the 139-pound light-welterweight division, one of 11 classes for nearly 400 boxers.

"Sugar Ray," says Nappi, "is a boxer-puncher who's a really classy fighter."

Other potential medal-winners on the United States team are Leon Spinks, 178-pound light-heavyweight; Clint Jackson, 147-pound welterweight; Howard Davis, 132-pound lightweight, and Davey Armstrong, 125-pound featherweight.

"Spinks is a real puncher, he's rough," says Nappi, a 58-year-old retired army master sergeant who has coached many service teams. "Jackson is our most experienced boxer. Davis is strictly a boxer, but a good one. Armstrong is our only boxer back from the Munich team."

The United States also has two brothers on the team for the first time—Michael Spinks is a 165-pound middleweight.

"Michael is our sleeper," Schwartz says. "He hits like a mule. But for our boxers, Friday's draw will be everything. The idea is to avoid the Cubans and the Eastern Europeans in the early rounds. If we get a good draw, we could win several gold medals. If the draw goes against us, it'll make it that much more difficult."

# NFL Chiefs Second-Guess Decision on Bell

KANSAS CITY, July 14 (AP). Bobby Bell, once the pride of the Chiefs, has defected to Kansas City's National Football League arch-rival, the Oakland Raiders.

It was a move that had the Chiefs' front office mumbling to itself that maybe it should have kept Bell at linebacker instead of agreeing with him to a mutual separation.

The Chiefs undertook a drastic rebuilding program last season. Bell sat out the year, his contract with Kansas City, and became a free agent.

Oakland signed Bell to a one-year contract to center deep in the defense and as a backup linebacker, picking him up on waivers.

Bell denied turning on the Chiefs. "You said they admitted it was a mistake to let me go," he said before leaving for training camp. "They said I lost a couple of steps. Hey, I'm 36 years old. I agree, but the experience and knowledge I have acquired is going to pay off."

Mike Hughes told his parents in Denton, Texas, "The Lord is more important to me than playing football."

"He felt like he and God had come to a conclusion that football wasn't the way he was meant to spend his life," said his mother, Norma Hughes, of the 6-foot-4, 251-pound offensive guard from Baylor University.

The Redskins drafted Hughes as a fifth-round pick. Coach George Allen had figured on Hughes to strengthen a position weakened by the retirement of Ray Schoenke and with regulars Paul Laaveg and Walt Sweeney coming off surgery.

Hughes' departure came a day after Curtis Akins, another rookie guard, left camp because of what Allen described as "a personal problem I'd rather not talk about."

Mrs. Hughes said her son had been active in the Fellowship of Christian Athletes and was a devout Baptist who might enter the ministry.

She said that her son had praise for the Redskins, saying he was happy with the team.

"He told me the Lord is going to control his life, and you can't try and convince someone otherwise," said Allen who had tried repeatedly to get Hughes to change his mind.

"He had a good chance to make our team," Allen said. "I did tell him if he has a change of heart he's welcome back."

# New Alignment Set for NBA

NEW YORK, July 14 (AP).—A realignment of the National Basketball Association's four divisions to incorporate the four expansion teams from the old American Basketball Association has been adopted unanimously by the NBA.

San Antonio will be added to the Central Division, joining the Washington Bullets, Atlanta, Cleveland, Houston and New Orleans.

The New York Nets will join the Atlantic Division with Boston, Buffalo, Philadelphia and the New York Knicks.

Indiana and Denver will become part of the Midwest Division with Chicago, Kansas City, Milwaukee and Detroit.

The Pacific Division will remain Golden State, Los Angeles, Phoenix, Portland and Seattle.

The Atlantic and Central Divisions make up the Eastern Conference, while the other two divisions are in the Western Conference.

The league also announced an adjusted schedule for 1976-77. Each team will play all teams in each conference as well as nine nonconference teams a total of four games each. Each team will play two teams outside its conference three games apiece, with these two teams to be determined by draw.

## Van Impe Leads Though Maertens Dominates Stage

BORDEAUX, July 14 (UPI).—Lucien van Impe of Belgium today kept the overall lead in the Tour de France although he failed to win any of the three short bicycle rides that comprised the tour's 18th and longest stage.

Freddy Maertens of Belgium took the day's first two heats. He pedaled over a shortened course of 53 miles in 2 hours 34:37 minutes. He then rode 76.5 miles in 3:27.

Gerben Karstens of the Netherlands won the third leg, covering 44 miles in 1:42:13.

At the request of the 88 remaining racers, today's stage, the longest in the race, was shortened by 30 miles.

## W. German Upsets Ashe

KITZBUEHEL, Austria, July 14 (UPI).—Top-seeded Arthur Ashe of the United States lost to Hans Juergen Pohmann of West Germany, 6-4, 6-3, in a tennis tournament here. Pohmann needed only one hour to defeat Ashe, dominating last year's Wimbledon winner throughout.

## Proving a Point

KINGSTON, Canada, July 14 (UPI).—Officials at the Olympic sailing events tightened their security measures yesterday after a man swam up undetected to a Canadian armed forces command ship and attached a cardboard canister on its side "to prove security is slack."

## Russia Prepares For Olympics With Soccer Tie

CHICAGO, July 14 (UPI).—Rainer Bonhof scored on a penalty kick with 10 minutes left last night to lift West German champion Borussia to a 3-3 tie with the Soviet Olympic soccer team and stone for a previous goal he scored for the Russians.

A questionable hand foul called on Soviet defender Vladimir Troshkin set up the winning penalty kick.

The Soviet team—Dynamo Kiev—opened the scoring at 1:22 as Anatoli Konkov converted a crossing pass from Alexander Minajev. Forty-two seconds later, the Germans tied it up as Herbert Heidenreich converted a rebound from Allan Simonsen.

The game concluded the Russians' pre-Olympic tuneup. They won one and tied two. They meet Canada July 19 in their Olympic opener.

# Owners Need Time to Study New Players Reserve Clause

By Murray Chass

PHILADELPHIA, July 14 (NYT).—Owners' approval of the four-year agreement with the players most likely won't come today, as expected, a number of baseball club owners indicated yesterday.

The 24 owners, or their representatives, will meet today but it seemed apparent from conversations with some of the group that a vote would be delayed pending further study of the complex agreement.

"We've discussed it among ourselves," said Calvin Griffith, owner of the Minnesota Twins, who opposed an immediate vote, "and most of us want to sit down with the lawyers and have it deciphered for us. You can't digest a thing like that in one meeting."

A delay in voting doesn't mean rejection of the historic agreement that was reached Monday with the players' association. However, Marvin Miller, executive director of the association, was surprised when he heard that there was a possibility of a delay.

"I think they'd be making a mistake if they put it off," Miller said, "but it's up to them. I guess you get the feeling that when people do that, they're trying to rally some negative forces."

Many owners were expected to object to various segments of the agreement, but only a handful were classified as being potential "no" voters. A majority of 13 owners is needed for approval, but there must be a minimum of five votes from each 12-team league.

The four owners said to be most likely to vote against the agreement were August Busch of St. Louis, Charles O. Finley of Oakland, Jerold Hoffberger of Baltimore and M. Donald Grant of the New York Mets.

The Player Relations Committee, the owners' eight-member negotiating unit, approved the agreement unanimously. The members have spent the last two days briefing owners and other club officials on the terms.

The key ingredients of the agreement that replaces the old reserve system include free agency for players after six years of major league service with repeater rights after an additional five seasons; a right to demand a trade after five years in the majors; the limitation of 12 clubs with which a free agent can deal; draft choices as compensation for lost free agents, and an increase of $1.85 million in the owners' annual benefit plan contribution of $8.3 million.

In addition, players who now have signed contracts will be able to play out their options and become free agents at the termination of their contracts, unless they sign new uniform player contracts after the agreement is ratified.

## Napoles Retires From Fighting

MEXICO CITY, July 14 (Reuters).—Former world welterweight champion José Napoles of Mexico announced his retirement, more than six months after he was beaten from his title by Britain's John Stracey.

The Cuban-born fighter, who held the World Boxing Council title for more than four years, said: "Everyone's life goes in a cycle. I think my best moments as a boxer have passed. But I am retiring at the top of my powers and financially comfortable."

Napoles, 39, had consistently failed to appear for medical examinations ordered by the local boxing authorities after Stracey took away his title here last Dec. 8.

Season until early September. Especially favorable rates for our American clients.

## Art Buchwald

# Super Garage Sale

WASHINGTON—The Democratic party is holding its super garage sale at Madison Square Garden this week, and there are many items of interest for the collector as well as bargain hunter.

Buchwald

Some of the bargains include: Sen. Hubert Humphrey's acceptance speech as the presidential candidate. The speech, written in February, 1976, is an emotional one, promising to bring all the elements of the party together, and telling why the senator has decided to reluctantly accept the draft of the Democrats to avoid a stalemate in New York. It is 200 pages long and typed, double-spaced, on white paper. It is brand new and has never been used.

* * *

A press release from Sen. Teddy Kennedy saying, although he had vowed he would never be a candidate for president in 1976, he has never committed himself on being Hubert Humphrey's vice-presidential candidate. He agreed to accept Humphrey's invitation to serve on the ticket only to prevent a Republican victory and for the good of the party. The press release goes on to state that no deals have been made with Humphrey for Teddy to be the presidential candidate in 1980, if he agrees to run as vice-president this time.

One hundred thousand copies of "The Wit of Henry Jackson." These paperbacks, which the publisher printed in January, are available at 10 cents a copy and are all autographed by Sen. Jackson. They make marvelous gifts for birthdays and other joyful events.

* * *

The garage sale is also offering campaign buttons from the primary. There are 700,000 "Fred Harris, the People's Choice" on sale; 200,000 "Milton Shapp, Everyone's Favorite Son"; and "Go to Church for Your President" buttons in various barrels.

Other items of interest are photographs of Mo Udall in front of the Lincoln Memorial, and Sarge Shriver standing outside a factory gate shaking hands with a worker in Massachusetts. Because of the heavy demand for them, only one photograph can be sold to each customer.

Another item which could go for a big price is the straw mat Gov. Jerry Brown slept on when he campaigned in Maryland and New Jersey.

* * *

And still another interesting bit of memorabilia is the china plate with the governor of Maryland's seal on it. This is the very plate that Gov. Marvin Mandel ate crow from before he stood up to endorse Jimmy Carter for president last week in Hershey, Pa.

Sen. Birch Bayh's TV commercials are on sale for $1.50 a minute. He is also offering his endorsements from various labor unions for 50 cents each, which he has now concluded was exactly what they were worth.

* * *

Another highlight of the garage sale has been contributed by Democratic congressmen. They are the various reform packages submitted in the House after the recent sex scandals. Nobody knows what is in the packages, and people will bid on them blindly. The reason they have been put on sale, a congressman told me, is that is the only way they could get them out of the committee.

A final item that has created a tremendous amount of interest is the typewriter that Elizabeth Ray actually used when she worked for Wayne Hays. The machine, an electric one, is brand new, and experts who have examined it say the ribbon has only seven letters imprinted on it.

## Roman Artifacts Found in Aegean

ATHENS, July 14 (UPI).—French undersea researcher Jacques Cousteau has raised more than 100 artifacts from a Roman vessel that sank in the southern Aegean Sea in the first century AD, the Archaeological Service said today.

Mr. Cousteau and his divers found several pieces of gold jewelry, the arm from a life-size marble statue, several dozen coins and a number of large amphorae and other pottery.

The shipwreck, off the island of Antikythera, was first discovered in 1902 when Greek divers found fine marble and bronze statuary, now displayed in Athens Archaeological Museum.

## £62,000 for a Bowl

LONDON, July 14 (Reuters).—A world auction record for a piece of glass was set at Sotheby's yesterday when a Persian glass bowl about 2,400 years old was bought by a London dealer for £62,000.

*'There was more shooting among the cowboys who came to Hollywood to earn $7.50 a day and drink at the old water hole in North Hollywood than there ever was in Dodge City.*

# The Old West and Westerns

By Bill Richards

SUN VALLEY, Idaho (WP).—There have been gun fights by the hundreds, endless series of hell-for-leather chases across the plains, and, for the last half century, a trail of Western movie mayhem that stretched through Cowtown and Railhead from Yuma to Boise.

But the bad old days were positively bucolic compared to the new breed of Western making its comeback today, according to former cowboy star Tim McCoy and another old Western movie actor, Iron Eyes Cody.

The two aging actors, who have logged more than 200 Westerns between them over the last half century, were among more than 200 Western film industry representatives, Western film scholars and Western buffs who gathered here recently for a discussion and a look at dozens of examples of that peculiarly American art form—the Western horse opera. The symposium was entitled, "Western Movies: Myths and Images."

"Compared to what is coming out these days we who were making Westerns years ago were gentlemen," said Iron Eyes Cody, a 62-year-old Cherokee who has made 130 Westerns since he broke into the movie business in 1925.

"Now," he said, "I find that I have to turn down some Western roles because they want me to appear naked and use a lot of four-letter words. A lot of Westerns today are just interested in sex and violence and that's not my idea of what the West was all about."

### Not as Violent

The real West, said Tim McCoy, who at 85 is one of the deans of the Western stars, was nowhere near as violent as filmmakers have been portraying it.

"There was more shooting among the cowboys who came to Hollywood to earn $7.50 a day and drink at the old water hole in North Hollywood than ever there was in Dodge City," he said.

McCoy and Cody began their cowboy and Indian careers together in the 1925 film "War Paint" and appeared together in more than 50 other Westerns before their last picture together in 1960. Cody is still acting and serves as technical director for Western filmmakers while McCoy is retired and living on his ranch in Arizona.

"I never look at Westerns they make these days," McCoy said. "They want to rub your nose in the vulgarity. I liked pictures where people spoke like gentlemen, not like bums."

The Western movie of old where McCoy, Tom Mix, Gary Cooper or John Wayne rode it out and shot it out with the Indians and the black hats had plenty of action, McCoy said. "The essential difference between those pictures and the Westerns they're making today is the difference between action and violence," he said.

### Three Fell

"We had enough shooting in some of those chase scenes to kill off 30 men and maybe three actually fell off their horses," said Cody. "Sure I killed people in those movies but today there's got to be more than just a lot of shooting."

Western moviemakers have never been overly concerned with historical accuracy, said Cody. Indians, for example, were not the first to take full scalps. "That began with the Mexicans and the bounty hunters," he said. "They show a lot of blood and scalping today but Indians fought each other for a thousand years and never took scalps. That's a lot of baloney that Fenimore Cooper and all those people wrote and the movies have been guilty of even more bad history."

McCoy, who was raised on a Wyoming ranch and is considered one of the few cowboy actors who is knowledgeable about Indian sign language, said he never played an Indian killer in his films.

"I tried to show that it wasn't always us against them and that sometimes whites did get along with the Indians," he said. "You couldn't have the Indians as the heavies all the time."

### Out Working

It was his job, he said, to find Indian actors for roles in early Westerns. "We never fussed around the way some of them do with a bunch of Mexicans dressed up as Indians," said McCoy. "Whenever anything would come up, I'd send up smoke signals and let Iron Eyes and the others know there was work."

1928: Tim McCoy, left, Rex Lease.

It was not just the Indian who has been inaccurately portrayed in Westerns, said McCoy. "Cowboys and Indians were too busy to spend all that time shooting at each other the way the movies showed," he said. "You didn't find cowboys sitting around on a fence waiting for someone to form up a posse the way a lot of those pictures showed. They were usually scattered from hell to breakfast working."

Some directors, Cody said, had a fixation on tall menacing Indian characters and consistently rejected short Indian actors. In one picture, he said, about Custer's last stand, a director rejected short Indians for the role of Sitting Bull because he couldn't shake his mental image of the famous Sioux warrior.

"We told them Sitting Bull was a short man and to be basically accurate that's the way he should appear in the picture. But he saw Sitting Bull as tall and that's the way Sitting Bull had to be.

"The image of Indians has been seriously harmed by historical inaccuracies in the movies and the only way we're going to straighten that out is for Indian people to do the writing and make their own movies," he said.

Women, too, have been poorly represented in Westerns. Blanche Sweet, who acted in 14 Western movies including "Fighting Cressy," and "That Girl Montana," said that in early Westerns women characters were portrayed as strong individuals.

"Something happened," said Miss Sweet, now 80 and a member of the National Film Review Board in New York. "I don't think women then were any stronger than they are now. They just don't seem to get the breaks. There aren't any Western roles being written for women today except for people who have no importance."

# PEOPLE: *Pat Nixon Begins Physical Therapy*

Pat Nixon has begun physical therapy as she continues to improve after a stroke last week. Tuesday, workers at Long Beach Memorial Hospital converted a lounge area adjacent to her sixth floor room into a therapy area. This was done, the hospital said, to avoid disrupting care of other patients in the rehabilitation center. "Treatments consist of strengthening exercises at her bedside," said Dr. John Langren. "The physical therapy program will include standing and walking exercises with the aid of a therapist one or two times a day."

* * *

Author Truman Capote, 51, pleaded guilty Tuesday in Southampton, N.Y., to a drunken driving charge. He paid a $165 fine and enrolled himself in a rehabilitation course. Capote was arrested May 30 by state police after his car collided with another in Bridgehampton, N.Y.

* * *

Actress Margaret O'Brien, 39, had her first child, a girl, Monday night in Cedars-Sinai Medical Center in Los Angeles. Miss O'Brien, who gained fame as a child actress in pictures such as "A Journey for Margaret" and "Meet Me in St. Louis" is married to Roy Thorsen, a businessman.

Margaret O'Brien . . . a daughter.

They cheered in Halifax when Queen Elizabeth of England and Prince Philip arrived Tuesday aboard the yacht Britannia. But there was gloom in Montreal where public opinion polls showed that French-speaking Canadians were less than enthusiastic about the royal visit. In one poll, 65 per cent of the French speakers opposed the Queen's tour. And Victor Goldbloom, Quebec's minister for municipal affairs and the man now effectively in charge of the Olympics, has said, "There was no necessity for a person to come from abroad to open the Olympic games." He thinks a Canadian should have presided.

* * *

Actress Liv Ullmann's book, "Changing," will be published by Alfred A. Knopf in New York in February. Although the 37-year-old author is not calling it an autobiography, Robert Gottlieb, Knopf's editor-in-chief, described it as a "personal book about being an actress, a woman and a mother." Knopf says Miss Ullmann wrote it herself over the past four years, first in Norwegian, then in English. It has not yet been published in a Scandinavian language.

An unemployed Liverpudlian who drew £36,000 in welfare benefits over the past seven years, spending £25 a week on Havana cigars, was jailed for six years Tuesday. Peter Deevey, 41, an unemployed fork lift operator, used 41 false names to "make" a living tax free.

* * *

Friedrich Schwend, Hitler's master-forger who counterfeited millions of British banknotes during World War II, was in jail in Bonn this week because he couldn't pay his hotel bill. Schwend, now 69, was last heard from in Lima where he served two years for fraud and other offenses. He was apparently deported from Peru, arriving in Bonn on July 4. He registered at the Black Cat Hotel and was turned over to police by the landlord because he didn't have 60 deutsche marks. The Bonn police plan to hand him over to justice authorities in Munich next week. He is wanted there on manslaughter charges. He is suspected of complicity in shooting one of his wartime agents, Theophil Kemper. During the war, Schwend masterminded the distribution of £5 and £10 notes in an effort to sabotage British currency. His forgeries were so good that the Bank of England had to cancel the whole of its £5 and £10-note issues at the end of the war.

Despite the fact that her son William, 47, would receive $125 million under the late Howard Hughes's "Mormon will," Hughes's aunt, Annette Gano Lummis, 85, has petitioned a Texas court to have it set aside. Mrs. Lummis was the late billionaire's closest relative. Shortly after his death on April 5, she and her son were named co-administrators of the Hughes interests in Texas. The executor named in the "Mormon will," Noah Dietrich, 87, sought last month to have them both removed. Now Mrs. Lummis has struck back. She has asked that the "Mormon will" be set aside and also that Nevada, rather than Texas, be declared the legal residence of her late nephew.

—SAMUEL JUSTICE.
